I. Introduction

A self-supporting and self-respecting democracy can plead no justification for the existence of child labor....

The problems associated with child labor in underdeveloped countries have captured our nation’s attention. Legislatures have passed statutes and resolutions, citizen coalitions have organized, and the media has devoted

2. The term “child labor” is used here to describe paid employment by persons under eighteen years of age. “Youth workers” and other terms are used throughout this article synonymously. “Child labor” is a term rich in historical and political connotations. At some point, of course, a “child” is old enough and experienced enough to act independently and choose to work. Most nations view eighteen as the age when a person officially moves from childhood to adulthood, with attendant legal and political responsibility. See, e.g., Convention on the Rights of the Child (CRC), U.N. GAOR, 45th Sess., 61st plen. mtg., art. 1, UN DOC, A/Res/44/25 (1989) (defining a child as a human being under the age of eighteen). All but two states have ratified the CRC; the United States has signed but not ratified, and Somalia has not signed or ratified. Office of the United Nations High Commissioner on Human Rights, Status of Ratifications of the Principal International Human Rights Treaties as of 09 June 2004, available at http://www.unhchr.ch/pdf/report.pdf (last visited Oct. 28, 2004). The U.S. common law, however, also recognizes legal adulthood as beginning at age eighteen or upon emancipation, such as by marriage or parental consent.
3. President Clinton issued an Executive Order barring federal agencies from purchasing goods produced with forced child labor. Exec. Order No. 13,126, 64 Fed. Reg. 32,383 (June 12, 1999). State legislatures have also addressed the issue.
4. See, e.g., Evelyn Iritani, Group Calls for Ban on Myanmar Imports; Leading Organization of U.S. Apparel and Footwear Makers Joins Campaign Protest ing Human Rights Abuses, L.A. TIMES, Apr. 16, 2003, at C4 (noting that “under pressure from citizens groups, retailers have become more vigilant about policing their overseas factories”); see also
extensive coverage to the issue.\(^5\) School classes have petitioned Disney and Nike to stop employing child workers in their overseas factories.\(^6\) Global Exchange protesters recently rallied in front of M\&M’s World store in Las Vegas to protest Mars’s use of cocoa harvested with child labor.\(^7\) Even portfolio managers are under investor pressure not to invest in foreign companies using child labor.\(^8\) Only one thing is missing from this wave of moral outrage and activism — attention to the problems of child labor here at home.

In 2001, more than 3.7 million American youths worked.\(^9\) Employment in the United States poses substantial, immediate, and long-term risks for youthful workers. Many are killed and injured each year.\(^10\) The total number of

---

6. The Invisible Children, N.Y. TIMES, Feb. 20, 2000, § 4, at 12; see also Doug Grow, City Kids Unite, Fight Sweatshops; Minneapolis School Board Takes Their Message Seriously, STAR TRIB., Nov. 26, 2002, at 2B (“[T]he question of what can be done about labor abuses ended up as a project of the Minneapolis district-wide student government. That body, made up of 10 students from each of the city’s high schools, started drawing up resolutions to alter the district’s purchasing policies.”).

10. The National Institute for Occupational Safety and Health (NIOSH) reports that an average of sixty-seven minors die each year from work-related injuries. NIOSH, RECOMMENDATIONS TO THE U.S. DEPARTMENT OF LABOR FOR CHANGES TO HAZARDOUS ORDERS x i (M A Y 3, 2 0 0 2), at t http://www.stopchildlabor.org/U5childlabor/nioshsummary.htm [hereinafter NIOSH REPORT].
occupational fatalities from 1992-1998 for youths under eighteen was 468.\textsuperscript{11}

An estimated 200,000 young people are injured on the job annually.\textsuperscript{12}

In addition to health risks, youth employment fails to teach children the skills they need to become responsible adults. Instead of using their wages to support their families, teens typically spend their wages on luxury items.\textsuperscript{13}

Contemporary American teens are avid consumers, spending $170 billion in 2002.\textsuperscript{14} Moreover, today’s workplace encourages

\textit{[y]oung people [to] perform tasks and use skills . . . that few will perform or use again in work settings after they cease to be adolescents. . . . [These jobs provide] little meaningful contact with adults who have a stake in their socialization for the future. . . . [E]conomic rewards . . . typically are used for . . . records, movies, designer clothing, fast food, alcohol, drugs — and not for long-term “adult” investments, such as college, or for increasing the adolescent’s ability to establish an independent household.}\textsuperscript{15}

\begin{flushright}

\textsuperscript{12} GAO Report, supra note 9, at 1. Hospital emergency departments treated an estimated 77,000 children for nonfatal injuries. NIOSH Report, supra note 10, at xi.

\textsuperscript{14} This is a $15 billion increase from 2000. Teen consumers purchase a wide variety of clothing, food, electronics, and other goods. Tony Rizzo, What’s Been Learned About How to Market to Teens (And Why), Credit Union J., Aug. 11, 2003, at 4; Teenage Research Unlimited (TRU), Teens Spent $170 Billion in 2002, Feb. 17, 2003, at http://www.teenresearch.com/Prview.cfm?edit_id=152. TRU surveys demographically representative American teens “on trends, lifestyles, attitudes, and consumer behaviors” twice each year. \textit{Id.} The “spending total[s] combine[] teens’ own discretionary spending and any spending they do on their parents’ behalf, whether for personal or household purchases.” \textit{Id.} Most teenage spending, however, is personal, and not for the family’s benefit. See Cox, supra note 13 (noting that teens spent $483 million online in 2000); Maxwell Murphy, Monday’s Investors Get Their Shares Off the Rack: Clothing: Apparel Retailers, Expected to Report Good Earnings, Seem to Be the Market’s Flavor of the Day, L.A. Times, Feb. 27, 2001, at C3 (“Teenage boys spend about 52% of their money on clothes, teenage girls about 75%.”); Rodriguez, supra note 13; TRU, Teens Spend $155 Billion in 2000, Jan. 25, 2001, at http://www.teenresearch.com/Prview.cfm?edit_id=75.

\end{flushright}
This premature affluence has its own risks.

A child’s employment status also negatively affects school work and social behavior, particularly when a child works excessive hours. Scholars define “high-intensity work” as twenty or more hours per week. Generally, high school students engaged in high-intensity work have lower grade point averages than students who do not work at all or who work fewer hours. In addition to lower grades, these student-workers are more likely to be suspended from school, use cigarettes and other substances, and experience a wide variety of other negative outcomes. Subgroups of youth workers, such as agricultural workers or teens in lower social and economic groups, are at even greater health and educational risks.

Contemporary U.S. child labor law and enforcement reflects a malignant indifference to the plight of American youth in the workplace. American law generally does not permit minors to make decisions with long-term consequences on their own. Yet the federal Fair Labor Standards Act (FLSA) requires no consent from — or even notification to — parents before a child may work. While some minimal hour limits are set for youths under sixteen in nonagricultural employment, only jobs or equipment designated “hazardous” by the Department of Labor (DOL) are off limits for children sixteen or older. Remarkably, those hazardous designations have remained

17. NATIONAL RESEARCH COUNCIL, INSTITUTE OF MEDICINE, PROTECTING YOUTH AT WORK 3-4 (1998) [hereinafter PROTECTING YOUTH AT WORK]. Some scholars have noted benefits of employment when youth work a moderate number of hours. See, e.g., Christopher J. Ruhm, Is High School Employment Consumption or Investment?, 15 J. LAB. & ECON. 735, 738 (1997).
20. Id.
22. See infra Part IV.B.
24. Fourteen-to sixteen-year-olds may not work more than eighteen hours per week during the school year, nor after 7:00 p.m. on a school night. 29 C.F.R. § 570.35(a) (2003).
largely unchanged for decades.\textsuperscript{26} The DOL, moreover, has imposed no other hour or place restrictions on the work of sixteen- and seventeen-year-olds.\textsuperscript{27}

The FLSA also has huge gaps in coverage, and private enforcement of the statute — typical of other civil rights and protective legislation — is unavailable.\textsuperscript{28} Despite DOL’s monopoly on enforcement, its performance is extraordinarily ineffectual.\textsuperscript{29} In the last decade, the federal courts decided only six lawsuits involving child labor violations.\textsuperscript{30} The DOL underestimates the numbers of illegally employed children and rarely initiates investigations of statutory violations.\textsuperscript{31}

States also regulate child labor, although most states follow the pattern of the federal FLSA.\textsuperscript{32} State child labor laws are also closely connected to compulsory school attendance laws, which determine the minimum permissible age for leaving school. While many states give parents the right to notice and consent concerning a child’s decision to drop out of school, other states leave the decision to the child once they attain a minimum age.\textsuperscript{13} The decision to work, however, is almost always left to the child.

Any attempt to explain the current inadequacies must begin with an analysis of the past. Historically, restriction of child labor was one front in a long legal
war waged to determine the constitutional boundaries between state and federal power. In many instances, and sometimes out of necessity, parents wanted children as immediate income providers, while employers desired this source of cheap and controllable labor. The enactment of state, and later federal, child labor laws was slow and bitterly contested. The original state statutes created modest restrictions on both parental ability to force young children to work and the right of employers to contract with children. Enactment of the child labor provisions of the federal FLSA in 1938 was a moral and political victory, but its practical effect was limited, as many of the FLSA’s protections were eviscerated during World War II.

In an attempt to rally public support for legislative reforms, the National Child Labor Committee, in the early 1900s, used dramatic visual images to document the horrors and negative social effects of unrestricted child labor. Louis Hine, a photographer and social reformer who worked for the Committee, photographed children in textile mills, the tobacco industry, and a variety of other settings. These images were immensely important in changing public opinion. Today, modern equivalents to Hine’s photos are desperately needed to focus America’s attention on contemporary child labor.

Despite the extraordinary economic and social changes in the United States, the FLSA remains largely unchanged since the 1960s. Over the years, powerful interests have resisted change. The Act contains numerous exemptions and significant structural defects; moreover, enforcement is lax. State child labor laws and administration reflect similar problems. Because children are politically voiceless, there is no powerful constituency demanding change. This political powerlessness leaves America’s youth largely forsaken.

This Article contains six parts. Part II describes the long struggle to protect children from the most shocking forms of exploitation in the late nineteenth and early twentieth centuries. Next, Part III sets out the legal structure of the contemporary regulation of child labor. Part IV examines the negative

consequences of the large number of minors engaged in high-intensity employment for American youth and society at large. Finally, Part V makes the case for changing the existing situation, highlighting the weaknesses of contemporary American child labor law and describing proposals for improvement.

II. How We Got Here: The History of Child Labor Regulation

A. A History of Child Labor

Child labor has a lengthy history in the United States. Children owed services to their parents, and parents could assign their children’s service to others. In colonial times, children were indentured for long periods. Master craftsmen contracted with parents to train the child in a trade or craft in exchange for years of the child’s services. “Bound out” orphans were taken in by strangers with the expectation that the child would provide useful labor.

Between 1860 and 1890, over ten million immigrants arrived in the United States. Often these families faced poverty and chronic underemployment; the wages from child labor were necessary to support the family. A study in Philadelphia in 1880, for example, revealed that children of Irish-born men earned between 38% and 46% of their household’s total income; in families

47. “Bound out” refers to orphans without relatives that were placed in homes, usually for the economic well-being of the master more than the orphan. Presser, supra note 45, at 558-59.

49. See, e.g., John Modell, Changing Risks, Changing Adaptations: American Families in the Nineteenth and Twentieth Centuries, in Kin and Communities: Families in America 119, 128 (Allan J. Lichtman & Joan R. Challinor eds., 1979) (describing child labor in working-class families “as an attempt to pool risks in what was experienced as a very uncertain world”).
with German-born fathers, children earned between 33% and 35%.\textsuperscript{50} Parents commonly made their children available for paid employment.\textsuperscript{51} These parents often opposed child labor reform because of the “desperate need . . . for additional income.”\textsuperscript{52}

Although the immigrant population remained largely concentrated in urban areas, work by children in agrarian areas was also frequently an economic necessity and, indeed, was seen as essential to a child’s upbringing. Americans at that time believed agricultural labor provided training for adulthood and independence.\textsuperscript{53} After the Civil War, however, the population overall migrated from rural communities to larger industrial cities.\textsuperscript{54}

By 1900, one out of every six children between the ages of ten and sixteen was gainfully employed.\textsuperscript{55} Children between ages ten and thirteen comprised one-third of the workforce in southern textile mills.\textsuperscript{56} Children in the post-Civil War South were particularly encouraged to work due to the loss of men in battle. From 1900 to 1920, the urban population in the United States grew by 80%, while rural populations correspondingly declined.\textsuperscript{57} Industrialization spurred employment of children in mines, mills, factories, canneries, and other

\textsuperscript{51} Presser, \textit{supra} note 45, at 460.

\textsuperscript{53} \textit{Id.} at 66-68; see also 41 CONG. REC. 1552 (1907) (statement of Sen. Beveridge) (“This bill does not strike at the employment of children engaged in agriculture. I do not for a moment pretend that working children on the farm is bad for them. I think it is the universal experience that where children are employed within their strength and in the open air there can be no better training.”).

\textsuperscript{55} Bureau of the Census, U.S. DEP’T OF COMMERCE & LABOR, OCCUPATIONS AT THE TWELFTH CENSUS cxiii (1904). A total of 1,750,178 children were employed, an increase of one million children since 1870. See Bureau of the Census, U.S. DEP’T OF COMMERCE, \textit{HISTORICAL STATISTICS OF THE UNITED STATES: COLONIAL TIMES TO 1970 75-84} (1975). This figure represented 6% of the total labor force. \textit{Id.} (reporting 765,000 child workers out of a total workforce of 12,925,000).

\textsuperscript{56} Employment of children in Southern states became more common in the late 1800s as the region’s textile industry expanded. By 1900, more children worked in southern mills than in any other sector of industry in the United States, and by 1906, southern mills employed an estimated 60,000 children under the age of fourteen. See Wood, \textit{supra} note 54, at 55. These figures did not include the many children under the age of ten who were known to be at work. \textit{Id.}

\textsuperscript{57} \textit{Id.} at 1-2.
manufacturing establishments. The short- and long-term hazards of work in these enterprises were often great. Unhealthy and dangerous working conditions abounded. Children’s labor in nineteenth and twentieth century America was parental property, stemming from the rule that parents are entitled to their children’s services. As one state supreme court justice asserted in 1888, “It is a rule as old as the common law that the father is entitled to the custody and control of his minor children, and to receive their earnings.” The right of parents to children’s services, however, correlated to the parent’s obligation to support the child and is statutory today in a number of states.

In the past, the pay envelopes of children workers were customarily given to

58. HINDMAN, supra note 36, at 33 (noting that women and children comprised the majority of the early industrial workforce in the United States).

59. See, e.g., EDWIN MARKHAM ET AL., CHILDREN IN BONDAGE 63-64 (Arno Press, Inc. 1969) (1914) (“In a Pennsylvania establishment, where the temperature on the outside was 88 degrees, the temperature at the point where the snap-up rubs off the excess glass was 100 degrees; in front of the glory-hole it was 140 degrees. . . . The speed rate of the snapping-up boy is fixed by the output of the shop, and in case of such small wares as one ounce and under he must work with great rapidity. . . . In one factory, . . . the distance from bench to oven was one hundred feet, and the carry-in boys made seventy-two trips in an hour.”).

62. Eustice v. Plymouth Coal Co., 13 A. 975, 976 (Pa. 1888). The court upheld the trial court’s denial of payment of wages to the mother of a thirteen-year-old worker. Id. Under the state law at that time, a mother was entitled to claim the earnings of her children only if the father did not provide for the child, and the mother was of suitable character. Id. The company successfully defended against the mother’s claim by asserting that the wages had been fully paid and that the plaintiff lacked suitable character. Id.

64. See, e.g., CAL. FAM. CODE § 7503 (West 1993) (“The employer of a minor shall pay the earnings of the minor to the minor until the parent or guardian entitled to the earnings gives the employer notice that the parent or guardian claims the earnings.”); IND. CODE ANN. § 31-34-20-6 (Michie 1997); MICH. COMP. LAWS ANN. § 722.2 (West 1997); MISS. CODE ANN. § 93-13-1 (1999); MO. ANN. STAT. § 452.150 (West 2000); MONT. CODE ANN. § 40-6-235 (1999); N.J. STAT. ANN. § 9:1-1 (West 1999); N.M. STAT. ANN. § 32A-21-5 (Michie 2003); N.D. CENT. CODE § 14-09-17 (2003); OHIO REV. CODE ANN. § 2111.08 (Anderson 2002); 10 OKLA. STAT. § 17 (2001); R.I. GEN. LAWS § 33-15.1-1 (1996); S.C. CODE ANN. § 20-7-100 (Law. Co-op. 2004); S.D. CODIFIED LAWS § 25-5-12 (Michie 2002).
parents unopened.\textsuperscript{65} Payroll records from the mid-nineteenth century reveal that fathers often signed for the children’s wages, suggesting that the fathers personally received and retained their children’s earnings.\textsuperscript{66} Children’s wages were often combined with that of their parents in a “family wage system,” where the family was hired and fired together.\textsuperscript{67} For many families with employed children during that period, the combined wages of the child workers constituted over half of the family income.\textsuperscript{68} In the landmark case of \textit{Hammer v. Dagenhart},\textsuperscript{69} Roland Dagenhart argued that the federal Keating-Owen Child Labor Act denied him his vested right to the earnings of his minor sons.\textsuperscript{70} Today, the FLSA mandates that employers pay workers their compensation,\textsuperscript{71} but many state laws may still give control over the earnings of unemancipated children to parents.\textsuperscript{72}

\begin{itemize}
\item \textsuperscript{65} Zelizer, supra note 52, at 100-01.
\item \textsuperscript{67} Hindman, supra note 36, at 35-36.
\item \textsuperscript{68} Dublin, supra note 66, at 173. A male-headed family with three working children received approximately 65\% of the annual family income from the children’s labor. \textit{Id.} This percentage would be even higher in the many female-headed households because female wages were considerably less than male wages. \textit{Id.}
\item \textsuperscript{69} 247 U.S. 251 (1918).
\item \textsuperscript{70} Woodhouse, supra note 60, at 1064 n.358 (citing to the record of \textit{Hammer v. Dagenhart}, 247 U.S. 251 (1918), overruled in part by United States v. Darby, 312 U.S. 657 (1941)).
\item \textsuperscript{71} “Every employer shall pay to each of his employees . . . wages at the following rates: . . . not less than $5.15 an hour . . . .” 29 U.S.C. § 206(a)(1) (2000). Employees under the age of twenty may be paid a subminimum wage of $4.25 an hour for the first ninety days of employment. 29 U.S.C. § 206(g)(1). Employers may not, however, displace other employees for the purpose of hiring workers at a subminimum wage. 29 U.S.C. § 206(g)(2).
\item \textsuperscript{72} See, e.g., Or. Rev. Stat. § 109.030 (2003) (“The rights and responsibilities of the parents, in the absence of misconduct, are equal, and the mother is as fully entitled to the custody and control of the children and their earnings as the father.”); Tenn. Code Ann. § 34-1-102(a) (2002) (“Each parent has equal powers, rights and duties with respect to the custody of each of their minor children and the control of the services and earnings of each minor child . . . .”); Tex. Fam. Code Ann. § 3.103 (Vernon 1996) (“During the marriage of the parents of an unemancipated minor, . . . the earnings of the minor are subject to the joint management, control, and disposition of the parents of the minor, unless otherwise provided by agreement of the parents or by judicial order.”). Some state statutes also specifically address the method of payment by employers to minor employees. Rhode Island’s statute on the earnings of minors states, in pertinent part:
\begin{quote}
The natural guardians shall have equal powers and rights . . . concerning the custody of the minor children, and both shall be entitled to their services, and to their earnings, the payment of which to either parent shall be a valid and sufficient discharge to the employer of the children until after notice in writing
\end{quote}
\end{itemize}
has been given to him or her by both or either of the parents of their intention to both claim the earnings.

B. Early Regulation in the States

Ideology, laissez-faire economic policies, and the considerable financial benefit from employing children blocked any serious consideration of the effects of child labor before the Civil War. Unions supported child labor restrictions, partly for humanitarian reasons and partly for economic considerations relating to depressed wages and adult unemployment. Mary Harris, usually referred to as Mother Jones, constantly advocated on behalf of working children and their parents. Resistance to regulation was strong, however, and the political weakness of the labor movement made reform more easily accepted when characterized as child welfare proposals rather than labor reforms. The most successful proponents for child labor regulation were religious organizations, women’s groups, and broad coalitions. Moreover, educators began insisting that work not interfere with children’s formal education. By the time of the Civil War, a handful of states had passed school attendance laws, but most of these laws contained no enforcement provisions. Pressure for compulsory education grew at the same time as pressure for child labor regulation, and the two movements developed simultaneously between 1830 and 1930.

Legal control of child labor was agonizingly slow and piecemeal. In 1833,
New York’s legislature failed to pass a compulsory school attendance law,\textsuperscript{82} despite the fact that children often worked twelve to fourteen hours per day, longer hours than were required of adult inmates in New York prisons.\textsuperscript{83} Massachusetts passed the first child labor law in 1836, prohibiting employment of children under fifteen years of age in industry, unless they had attended school for at least three months during the previous year.\textsuperscript{84} In the mid-1800s, a few states began setting minimum age requirements for work\textsuperscript{85} and limiting working hours.\textsuperscript{86} Momentum for child labor regulation increased near the beginning of the twentieth century.\textsuperscript{87} A growing “progressive” movement opposed child labor as destructive of family values and inconsistent with the child’s and society’s long-term interests.\textsuperscript{88} By 1907, forty-two states had some type of child labor legislation.\textsuperscript{89} Even southern states, where child labor was widespread, began passing regulatory legislation.\textsuperscript{90} Widespread violations of these laws occurred, however, primarily because of the lack of enforcement and ignorance.\textsuperscript{91}

Clearly, an irregular web of state laws could not solve this national problem.\textsuperscript{92} Economic concerns created disincentives for states to regulate the problem, particularly when neighboring states had less stringent laws and thus

\end{footnotes}
reaped an economic benefit. Employers could play one state against another. At the same time, reform efforts varied by state and region. In 1907, Senator Albert Beveridge of Indiana, a prominent proponent of child labor restriction, made an historic three-day speech on the U.S. Senate floor. Senator Beveridge characterized the situation as follows:

Here is an abstract of the State laws upon the subject of child labor. There are not six of them alike. Some have no child-labor laws at all; others are worse than any laws, because they are pretenses at labor legislation which make the people and the country think that something has been done, when, as a matter of fact, nothing has been done, and the ruin that went on before without the sanction of the law continues under the sanction of the law.

Because of the varied state approaches to the child labor problem, federal legislation was the only realistic solution.

C. Federal Developments Until 1937

In 1906, Senator Beveridge and Representative Herbert Parson introduced the first federal statutory proposals restricting employment of children in factories and mines, but the measure failed. In 1907, federal legislation authorized the Secretary of Commerce and Labor “to investigate and report upon the industrial, social, moral, educational, and physical condition of women and child workers in the United States.” Ultimately, the legislation resulted in nineteen volumes, published by the federal government, detailing the problems associated with employment of women and children.

Congress passed the first federal child labor law, the Keating-Owen Act on Child Labor, in 1916. Under the Act, neither mines, where children under age sixteen worked, nor factories that employed children under fourteen, could ship commodities in interstate commerce. The Act also limited the working hours of children ages fourteen to sixteen to eight hours per day and only six days per

93. Id. at 1808.

100. Id. § 1, 39 Stat. at 675.
week, and prohibited work after 7:00 p.m. and before 7:00 a.m.\textsuperscript{101} State officials assisted in the enforcement of the Act and, in the nine months the law was in effect, almost 700 inspections revealed 293 establishments in violation of child labor statutes.\textsuperscript{102}

During the Lochner era,\textsuperscript{103} the federal judiciary, led by the U.S. Supreme Court, aggressively protected economic rights under the Due Process Clause and used federalism concepts to limit Congress's ability to regulate the economy.\textsuperscript{104} In this judicial climate, the Supreme Court in \textit{Hammer v. Dagenhart} declared the Keating-Owen Act unconstitutional.\textsuperscript{105} The suit was brought by a poor father of two employed sons,\textsuperscript{106} represented by a distinguished group of nationally known corporate attorneys presenting familiar constitutional arguments.\textsuperscript{107} Before the Court, Solicitor General John W. Davis argued that ruinous competition among the states created an insurmountable barrier to nonfederal regulation of child labor.\textsuperscript{108} The Court rejected the argument\textsuperscript{109} and held that the statute was beyond Congress's power under the

---

\textsuperscript{101} \textit{Id.} Violations of these provisions were punishable by a fine of up to $200 per offense for a first conviction, and a fine of up to $1000 or imprisonment for subsequent convictions. \textit{Id.} § 5, 39 Stat. at 675-76.

\textsuperscript{102} \textit{Children and Youth, Vol. II, supra} note 90, at 708-09.

\textsuperscript{103} \textit{Lochner v. New York}, 198 U.S. 45 (1905) (declaring unconstitutional a New York law that set the maximum hours bakers could work because it interfered with “freedom of contract” and was not justified by a legitimate policy purpose). The term “Lochner Era” is commonly used to describe the period, between the late 1890s and 1937, when the U.S. Supreme Court struck down many state and federal laws as unconstitutional because they interfered with “freedom of contract” or expanded congressional power at the expense of state prerogatives.

\textsuperscript{106} One son was under the age of fourteen, the other under the age of sixteen, allowing both the minimum age and the limited hours provisions to be challenged in a single suit. \textit{Hammer}, 247 U.S. at 252. Interestingly, later in life, Reuben Dagenhart, the younger son, said he would have been “a lot better off” if his employer had won the suit because he really needed the education he did not receive. \textit{Children and Youth, Vol. I, supra} note 80, at 716.

\textsuperscript{107} \textit{Wood, supra} note 54, at 97.

\textsuperscript{109} \textit{Hammer}, 247 U.S. at 273 (“There is no power vested in Congress to require the States to exercise their police power so as to prevent possible unfair competition. Many causes may cooperate to give one State, by reason of local laws or conditions, an economic advantage over
Commerce Clause because it regulated “local production,” not interstate transportation. Control over child labor was vested in the states under their traditional police powers, and Congress could not interfere.

The year after *Hammer v. Dagenhart* was decided, Congress once again sought to regulate child labor, this time under its taxing power. The Child Labor Tax Law assessed a 10% tax on the profits of manufacturing establishments that used child labor in violation of the minimum age requirements and limited hours of the Keating-Owen Act. This Act was clearly a regulatory provision and only incidentally a revenue generator. Like the Keating-Owen Act, the Child Labor Tax Act was short-lived. In 1922, the Supreme Court in *Bailey v. Drexel* declared the tax unconstitutional as an improper regulation of a state function. Chief Justice William Howard Taft argued that the Act was not a tax but rather a penalty assessed to regulate what the Constitution had reserved exclusively for state power.

After two unsuccessful federal attempts at legislating child labor, child labor reform advocates retained only one practical alternative. Samuel Gompers, President of the American Federation of Labor, noted that “the Supreme Court deals with childhood exactly as it would deal with pig iron. . . . [A] Constitutional amendment is needed to complete the work quickly.” During the spring of 1924, the House of Representatives, by a vote of 297-68, and the others. The Commerce Clause was not intended to give to Congress a general authority to equalize such conditions.”

110. *Id.* at 272. The *Hammer* dissent focused on the many instances where the Court had upheld regulations passed under the Commerce Clause for reasons indistinguishable from the majority’s rationale. *Id.* at 277-81 (Holmes, J., dissenting). The dissent also insisted that Congress’s power to regulate commerce was unqualified under the Constitution, *id.* at 277, and that although states could regulate their own domestic commerce, “when they seek to send their products across the state line they are no longer within their rights,” *id.* at 281.

111. *Hammer’s* holding was, of course, in striking contrast to numerous prior decisions. See, e.g., *Hoke v. United States*, 227 U.S. 308, 323 (1913) (“Congress[’]s . . . power over transportation ‘among the several states’ . . . is complete in itself,” and rules adopted under the Commerce Clause “may have the quality of police regulations.”).

113. Children under fourteen could not be employed. The Act limited the working hours of children ages fourteen to sixteen to eight hours per day, six days per week, and prohibited work after 7:00 p.m. and before 6:00 a.m. *Id.*

114. Hindman, *supra* note 36, at 72 (noting that the Act raised approximately $41,000 in revenue, while costing over $300,000 to administer).

116. *Id.* at 44.

117. *Id.* at 39.

The Amendment read as follows:

Section 1. The Congress shall have power to limit, regulate, and prohibit the labor of persons under 18 years of age.

Section 2. The power of the several States is unimpaired by this article, except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress.

66 CONG. REC. 3212 (1925).

See generally Bill Kauffman, The Child Labor Amendment Debate of the 1920's; or, Catholics and Mugwumps and Farmers, 10 J. LIBERTARIAN STUD. 139 (1992) (describing issues of federalism and states’ rights in debates over the proposed amendment). The President of the American Bar Association claimed that the Amendment was “a communistic effort to nationalize children, making them primarily responsible to the government instead of to their parents.” Id. at 140. Congressman Fritz G. Lanham likewise mocked the Amendment as enjoining children to “obey your agents from Washington, for this is right. Honor thy father and thy mother, for the Government has created them but a little lower than the Federal agent. Love, honor, and disobey them.” Id. Many of these opposition groups also actively opposed other reforms being proposed at the same time. J. STANLEY LEMMONS, THE WOMAN CITIZEN: SOCIAL FEMINISM IN THE 1920's 25-30, 45 (1973).

WALTER L. TRATTNER, CRUSADE FOR THE CHILDREN: A HISTORY OF THE NATIONAL CHILD LABOR COMMITTEE AND CHILD LABOR REFORM IN AMERICA 170-71 (1970). The main objections to the proposed amendment were that it interfered with states’ rights, curtailed parents’ control of the child, especially where the child labored on the family farm, and was a “communist inspired plot.” Id.; see also 66 CONG. REC. 2677 (1925) (“This proposed amendment would take from the States and from parents the entire control of all children. . . . It is a direct and terrific attack upon home life, as well as upon the rights of individual States.”). Opponents greatly exaggerated the reach of child labor regulation, suggesting to the public that it would be illegal for children to perform household chores for their parents. A political cartoon from 1925 depicted two lounging adolescents refusing to help their parents with chopping wood and washing dishes, claiming their assistance in these tasks would violate the law. The cartoon’s inscription reads “Under the Twentieth Amendment.” W. A. Ireland, Under the Twentieth Amendment, COLUMBUS (OHIO) DISPATCH, Jan. 20, 1925, reprinted in CHILDREN AND YOUTH, VOL. II, supra note 90, at 718.

Act’s purposes included reemployment of workers, creation of decent wages, and prevention of unfair competition. Child labor was seen as a significant factor in all of these problems. The NIRA empowered trade associations, organized by industry and unions, to create voluntary regulations which, when approved by the President, would become an enforceable industrial code. Most of the codes prohibited employees under eighteen from performing “hazardous work” and set minimum age requirements for workers. The U.S. Supreme Court declared the NIRA unconstitutional in *A.L.A. Schechter Poultry Corp. v. United States*. Despite being declared unconstitutional, the NIRA child labor provisions became the model for the FLSA.

**D. The FLSA**

In the mid-1930s, still suffering from an economic depression, many Americans saw child labor as a cause of both low wages and underemployment of adult workers. A uniform federal law was essential to protect goods in more progressive child labor states from unfair competition. As Representative Schneider from Wisconsin noted:

States which have already adopted laws to correct these evils within their borders will welcome the help of similar high standards for the country at large. Wisconsin and other States with a 16-year standard for child employment too long have been faced with the competition of goods manufactured in low-standard States. . . . States have found themselves frequently powerless to enact adequate laws in the face of pressure from these competing forces. It remains for the Congress to assist in producing a universal standard to aid

---

126. 77 CONG. REC. 6236 (1933).
127. NIRA § 3, 48 Stat. at 196.
128. Samset, *supra* note 125, at 75. The NIRA was responsible for blocking 100,000 child laborers under the age of sixteen from the work force; when the statute was declared unconstitutional, those children went back to work. *See Fair Labor Standards Act of 1937: Joint Hearings on S. 2475 and H.R. 7200 Before the S. Comm. on Educ. and Labor and the House Comm. on Labor, 75th Cong. 1483-85 (1937)* (remarks of Hon. Francis Perkins, Secretary of Labor).
129. 295 U.S. 495, 521, 524 (1935) (upholding a Second Circuit decision that held unconstitutional wage and hours provisions regulating the wholesale poultry trade because Schechter’s Market was not actually “in” interstate commerce, and invalidating the NIRA).
130. Representative Sirovich asserted that if certain exceptions in the child labor provisions were allowed, then “a million boys and girls under 16 will still work in the mills, the mines, the looms, and the factories producing goods that enter interstate commerce and taking the positions of men entitled to them.” 82 CONG. REC. 1692 (1937). Representative Voorhis added, “And undercutting the wage scale of their fathers who ought to have their places.” *Id.* (emphasis added).
the States in their good intentions.\(^{131}\)

But economic considerations were only part of the justification for federal regulation of child labor. Representative Schneider further asserted that “[t]he moral effect of these provisions by itself is sufficient reason for our favorable action upon them.”\(^{132}\) Ultimately, after a lengthy debate, Congress enacted the FLSA, including its child labor provisions, in 1938.\(^{133}\)

By the time a case challenging the constitutionality of the FLSA reached the Supreme Court, a number of important developments had occurred. In a series of cases involving substantive due process and the scope of national power, Justice Roberts reversed direction and cast the deciding fifth vote to uphold legislative initiatives dealing with economic problems.\(^{134}\) In *West Coast Hotel v. Parrish*,\(^ {135}\) the Supreme Court, by a vote of 5-4, upheld a state statute establishing a minimum wage for women employees.\(^{136}\) One year later, the Supreme Court signaled a new policy of judicial deference to national regulation based on the Commerce Clause. In *NLRB v. Jones & Laughlin Steel Corp.*,\(^ {137}\) the Court upheld the National Labor Relations Act, effectively overruling the limits that the Court had placed on Congress’s power during the Lochner era.\(^ {138}\)

It was thus not surprising when the Court upheld the FLSA in *United States v. Darby*,\(^ {139}\) overruling *Hammer v. Dagenhart*. Although *Darby* involved no child labor issues, the Supreme Court approved the FLSA in its entirety.\(^ {140}\)

\(^{140}\) The majority held that the prohibition and regulation of wages and hours was within
While the FLSA constituted an enormous step forward in establishing national standards, the immediate gains were modest in practice. Although the Act was undoubtedly an educational and moral force, “in those areas where children are useful they continued to be employed.”\footnote{141} Jonathon Grossman, historian at the DOL, noted that “[t]he law avoided some sectors of the work force where most abuses of child labor were concentrated.”\footnote{142} Indeed, while approximately 850,000 children under sixteen were gainfully employed in 1938, only an estimated 50,000 were subject to the Act.\footnote{143} “Children in industrial agriculture, intrastate industries, the street trades, messenger and delivery service, stores, hotels, restaurants, beauty parlors, bowling alleys, filling stations, garages, etc., were outside the law.”\footnote{144}

One Supreme Court decision quickly highlighted the limitations of the FLSA. In Western Union Telegraph Co. v. Lenroot,\footnote{145} the Court found that the Act did not apply to transmission of telegraph messages because no “goods” were produced in such work.\footnote{146} Since the Lenroot decision in 1945, the Supreme Court has not decided a single case regarding the substantive provisions of the FLSA or similar state statutes and regulations.\footnote{147}
E. Child Labor During World War II

The initial version of the FLSA prohibited employment of children under sixteen. When the United States entered World War II, the work force was soon exhausted. When a labor shortage emerged as males entered the armed services, women entered the work force in large numbers. World War II also affected child labor. According to the DOL, “[c]ontrary to general belief, the early withdrawal of boys and girls from school was a greater factor in the expansion of the labor force than was the increase in the number of women working.”

At the outset of World War II, the United States had historically low levels of child labor and high levels of school enrollment. Following the outbreak of the war, school enrollment fell by 24% for fifteen- to eighteen-year-olds, while the number of fourteen- to seventeen-year-olds employed increased by 200%. Illinois is illustrative: during 1943, the number of Illinois children who legally left school to go to work was 400% greater than in 1942.

Nationally, young workers who were not attending school worked an average of forty-six hours per week. The DOL recognized that many students who dropped out of school to partake in wartime labor were unlikely to return to school after the war. Other consequences quickly emerged as the number of employed youths rose. For example, work accidents involving children

151. Aruga, supra note 39, at 503; U.S. DOL, Child-Labor Problems in Wartime, 59 MONTHLY LAB. REV., Nov. 1944, at 1034-35 [hereinafter Child-Labor Problems in Wartime]; see also Ellen Greenberger, Working in Teenage America, in WORK EXPERIENCE AND PSYCHOLOGICAL DEVELOPMENT THROUGH THE LIFE SPAN 14 (Jeylan T. Mortimer & Kathryn M. Borman eds., 1988). Of the fourteen- to fifteen-year-olds, only 3% of the boys and 1% of the girls were in the labor force at this time. Greenberger, supra, at 14.
152. Aruga, supra note 39, at 498. School enrollment for fifteen- to eighteen-year-olds fell by 1.2 million, and employment of fourteen- to seventeen-year-olds increased by over two million. Id.
155. Id. at 17.
increased. In Michigan, there was a 183% increase in compensable injuries to children, and in Illinois, work accidents involving children rose 100% from 1942 to 1943. The DOL attributed the increase both to the rise in the number of children employed generally and to the sharp increase in children employed in hazardous jobs.

The type of work performed by young people during the war changed; a shift from primarily agriculture to a balance between agriculture, manufacturing, and services occurred. In April of 1944, six times as many workers between the ages of fourteen and seventeen worked in manufacturing, and over seven times more worked in service jobs, than in 1940. Manufacturing employed one-third of youths no longer attending school. The service industries employed 15% of teenage workers in 1944 compared to only 6% in 1940.

Limited enforcement of child labor restrictions and relaxation of state and federal regulations contributed to the drastic increase in young workers during World War II. For example, during 1943, Illinois had the highest level of illegally employed children, but only fourteen out of a total of 986 known violations were prosecuted. In 1942, the Secretary of War requested that the DOL grant an exemption to the eighteen-year-old minimum age limit for hazardous occupations, which the DOL granted. The Children’s Bureau, Department of Agriculture, U.S. Employment Service, and the Office of Education prepared a policy statement encouraging the recruitment of young workers for agricultural jobs and gave approval for children to work during the school year. In 1943, forty-four state legislatures considered child labor bills, and most states softened strict restrictions on child labor. Both California and Massachusetts granted their governors the power to permit children to work, and many states lowered the minimum age for certain jobs.

III. The Current Legal Regime

Despite economic and social transformations since World War II, the FLSA has remained substantially unchanged. The FLSA outlaws “oppressive” and “hazardous” work for minors in commerce or in the production of goods for commerce. Persons under eighteen years of age may not be employed in mining or manufacturing or “in any occupation which the Chief of the Children’s Bureau in the Department of Labor shall declare to be particularly hazardous for the employment of children . . . or detrimental to their health or well being.”

Sixteen is the usual minimum age for employment, but the Secretary may permit employment of fourteen- to sixteen-year-olds in work that does not interfere with schooling and is not detrimental to the child’s “health and well-being.” The Act restricts youths under sixteen to no more than three hours of work per day and eighteen hours per week in nonhazardous tasks in retail, food service, and gasoline service stations when school is in session. During vacations, a minor under sixteen may work a maximum of eight hours per day and forty hours per week. With the exception of barring hazardous occupations, adolescents over sixteen have no federal restrictions on the number of hours or the time of day they may work. There are no parental or school consent requirements imposed by federal law.

---

169. 29 U.S.C. § 212(c) (2000). “Oppressive child labor” is defined as a condition of employment under which (1) any employee under the age of sixteen years is employed . . . or (2) any employee between the ages of sixteen and eighteen years is employed . . . in any occupation which the Chief of the Children’s Bureau in the Department of Labor shall find and by order declare to be particularly hazardous for the employment of children between such ages or detrimental to their health or well-being . . . .

170. If the occupation has been declared hazardous by the Secretary of Labor, eighteen is the minimum age to work in that job. See 29 C.F.R. § 570.120 (2003). Those designations have remained unchanged since 1975. Id. § 570.67. NIOSH has made recommendations for changes to these hazardous occupation orders. See NIOSH REPORT, supra note 10. However, no action has been taken.

171. See 29 C.F.R. §§ 570.1-570.129.

172. Id. § 570.35.

173. In addition, the Act also restricts fourteen- and fifteen-year-olds from work during school hours, before 7:00 a.m., or after 7:00 p.m. (9:00 p.m. during summer, nonschool months). Id.

When an employer violates the child labor provisions of the FLSA, the DOL must determine an appropriate penalty for the violation.\textsuperscript{175} Although the Act originally contained only criminal penalties, the FLSA now provides for civil remedies.\textsuperscript{176} Employers who willfully violate the Act may be fined not more than $11,000 or, after a prior conviction for violation of the provisions, imprisoned for not more than six months or both.\textsuperscript{177} The Secretary of Labor, subject to the direction and control of the Attorney General, may also petition a federal district court for injunctive relief.\textsuperscript{178}

\textbf{B. State Laws}

Although the FLSA does not preempt the field of child labor legislation,\textsuperscript{179} state provisions tend to follow federal law. Many state statutes provide minimum age requirements, limit working hours, and prohibit employment in hazardous occupations. All states place some limits on night work for minors under age sixteen.\textsuperscript{180} Similar to the FLSA, sixteen- and seventeen-year-olds in most states have legal freedom to choose the number of hours they will work.\textsuperscript{181}

\textsuperscript{175} 29 U.S.C. \textasciitilde 216(e). In determining the amount of the penalty, the Secretary is to consider: (1) its appropriateness relative to the size of the business; and (2) the gravity of the violation, including the number of times violations have occurred, aggravating factors such as falsification of records, and the employer’s record of previous child labor violations, if any.\textit{Id.} Administrative appeal is available before an administrative law judge from the Wage and Hour Division of the DOL. The potential civil penalty currently ranges from $275 to $11,000.\textit{Id.}

State child labor laws typically impose criminal or civil penalties on employers for violating the statute.\textsuperscript{182}

While there are many similarities, important differences exist between state and federal law. Thirty-five states require children under age sixteen to secure government-issued work permits or certificates,\textsuperscript{183} while seventeen states require permits for teens over sixteen.\textsuperscript{184} Sometimes these laws require school officials to certify satisfactory performance in school.\textsuperscript{185} Ten states require parental consent to issue an employment certificate to a child under sixteen.\textsuperscript{186} Five additional states require both parental and school consent for children under sixteen.\textsuperscript{187} Only six jurisdictions require parental consent for adolescents sixteen and older to work,\textsuperscript{188} while only three states require both parental and school consent for these youths to work.\textsuperscript{189}

\textsuperscript{189} Ind. Code Ann. §§ 20-8.1-4-7, 20-8.1-4-15; Iowa Code §§ 92.2, 92.11; Wash. Rev. Code § 49.12.121. Only a few states impose criminal or civil penalties on parents or
Our current legal regime reflects a remarkably laissez-faire response to the millions of youths in America’s workplaces. Especially in the case of older teens, federal and state statutes create few restrictions on their labor. There is little legal protection for parental input and control of youthful decisions regarding work and school. The consequences of this legal vacuum are great.

IV. The Consequences of American Child Labor

A. Adolescent Risk-Creating Behavior

As a class, adolescents tend to engage in risk-creating behavior.\textsuperscript{190} Defiance and self-gratification frequently motivate behavior.\textsuperscript{191} The results are as predictable as they are tragic. One-half of U.S. adolescents are within moderate or greater risk of unsafe sexual behavior, teenage pregnancy, and childbearing, abuse of drugs or alcohol, academic failure and removal from school, or behaviors creating interaction with police and court systems.\textsuperscript{192} An astonishing 10\% of children in this age range engage in all of these risky behaviors.\textsuperscript{193}

Teens’ choices are often characterized by immaturity of thought or action.\textsuperscript{194} During adolescence — the transitional stage from childhood to adulthood — emotions, hormones, identity, and the physical body are in a period of change. Research has confirmed that the brain also changes significantly during this period.\textsuperscript{195} For both social and biological reasons, teens have great limitations.

\textsuperscript{191} See generally Elizabeth Cauffman & Laurence Steinberg, The Cognitive and Affective Influences on Adolescent Decision-Making, 68 TEMP. L. REV. 1763 (1995); see also Marty Beyer, Recognizing the Child in the Delinquent, 7 KY. CHILD. RTS. J. 16, 17-20 (1999); Jeffrey Fagan, Context and Culpability in Adolescent Crime, 6 VA. J. SOC. POLY & L. 507, 516-17, 524 (1999); Furby & Beyth-Marom, supra note 190, at 1-2; Scott & Steinberg, supra note 190, at 815.

\textsuperscript{195} See, e.g., Thomas Paus et al., Structural Maturation of Neuro Pathways in Children and Adolescents: in Vivo Study, SCIENCE, Mar. 1999, at 283; Interview by PBS Frontline with
in making mature decisions and understanding the consequences of their actions. Adolescent behavior, and the mental processes that motivate it, are a product of the interface of the neurophysiological processes of the body and interpersonal relationships with family, peers, and the larger community.\textsuperscript{196} These limitations persist until the early twenties,\textsuperscript{197} which explains why teens have historically had their privileges to contract, marry, vote, drive, and make other significant decisions restricted and subject to adult supervision.\textsuperscript{198} Regulations on adolescent employment, however, are notably absent.

B. The Anomaly of Juvenile Decision Making in the Labor Market

Contemporary American law reflects the dominant historical paradigm that minors are legally incompetent to make major life decisions. The law itself provides many restrictions; otherwise, parents are entrusted with the task of making these choices because they will normally act in the child’s best interest.\textsuperscript{199} Although parental discretion and authority may be restricted in matters affecting the child’s welfare, as illustrated by compulsory vaccination laws,\textsuperscript{200} in almost all other situations, parents have a “fundamental right . . . to make decisions concerning the care, custody, and control of their children.”\textsuperscript{201} This legal doctrine rests on the principle of protecting adolescents against improvident judgments and impaired decisional abilities.\textsuperscript{202}

Minimum age requirements govern the right to vote,\textsuperscript{203} to marry,\textsuperscript{204} and even

\footnotesize

198. See infra Parts IV.B, V.A.2.a-c.

199. “[P]arents generally have the right, coupled with the high duty, to recognize and prepare their children for additional obligations. . . . The law’s concept of the family rests on a presumption that parents possess what a child lacks in maturity, experience, and capacity for judgment required for making life’s difficult decisions. More important, historically it has recognized that natural bonds of affection lead parents to act in the best interests of their children.” Parham v. J.R., 442 U.S. 584, 602 (1979) (internal citations, quotations and alterations omitted). See also Bellotti v. Baird, 443 U.S. 622, 634 (1978) (recognizing that “the constitutional rights of children cannot be equated with those of adults [because of] the peculiar vulnerability of children; their inability to make critical decisions in an informed, mature manner; and the importance of the parental role in child rearing”).

203. See, e.g., ILL. CONST. art. III, § 1; IND. CONST. art. II, § 2; KY. CONST. § 145; CAL. ELEC. CODE § 2000 (West 1999); FLA. STAT. ANN. § 97.041; IOWA CODE ANN. § 48A.5 (West
to attend movies rated NC-17. Children under eighteen may not bring suit in their own names and may disaffirm a contract based on their minority status alone. Without parental authorization, there is normally no informed, competent consent for medical treatment. Decision making regarding transplantation of body organs or tissue is similarly left to parents. Minors in every state may obtain driving privileges only where a parent or custodian sponsors and signs the license application. Alcohol consumption by teens is legally prohibited, and Congress has required states to enact legislation

1996).

204. See, e.g., CAL. FAM. CODE § 301 (indicating that the age of consent for marriage is eighteen); see also Moe v. Dinkins, 533 F. Supp. 623, 630-31 (S.D.N.Y. 1981), aff’d, 669 F.2d 67 (2d Cir. 1982), cert. denied, 459 U.S. 827 (1982) (upholding New York law requiring parental consent for marriages of persons between the ages of fourteen and eighteen).

207. See, e.g., MASS. GEN. LAWS ANN. ch. 112, § 12F (Law. Co-op. 1991); Susan D. Hawkins, Note, Protecting the Rights and Interests of Competent Minors in Litigated Medical Treatment Disputes, 64 FORDHAM L. REV. 2075 (1990). There are limited exceptions to the rule that parental consent is needed for medical treatment. See, e.g., CAL. FAM. CODE § 6920; R.I. GEN. LAWS § 23-4.6-1 (1996). The best known exception is the adolescent’s decision to terminate a pregnancy. Here, the interests of parents and children may indeed conflict. It is unconstitutional for a state to give parents “an absolute, and possibly arbitrary, veto over the decision of the physician and his patient to terminate the patient’s pregnancy, regardless of the reason for withholding the consent.” Planned Parenthood v. Danforth, 428 U.S. 52, 74 (1976). These exceptions are not replicated in most medical decision making and may have more to do with conflicting attitudes about the decision itself — abortion — than with views about parental authority or the maturity or autonomy interests of adolescents.

209. See, e.g., ALASKA STAT. § 28.15.071 (Michie 2002); COLO. REV. STAT. § 42-2-108 (2004); MISS. CODE ANN. § 63-1-23 (1999 & Supp. 2003). The purpose is to protect public safety and ensure “financial responsibility by individuals who may exercise some control over a minor’s actions.” Johnson v. Schlitt, 565 N.W.2d 305, 307 (Wis. Ct. App. 1997) (citing Ynocencio v. Fesko, 338 N.W.2d 461, 464-65 (Wis. 1983)). The adult assumes liability for damages caused by the minor’s negligent or intentional conduct while driving. The liability is generally joint and several with the minor. See, e.g., FLA. STAT. ANN. § 322.09 (West 1998). In most states, parents may avoid liability by requesting the motor vehicle department to revoke their child’s license. See, e.g., WIS. STAT. ANN. § 343.15 (West 2004).

210. The National Minimum Drinking Age Act, 23 U.S.C. § 158 (2000), requires the Secretary of Transportation to withhold federal highway funds from any state “in which the
restricting sale and distribution of tobacco products to minors.\textsuperscript{211}

In contrast, legal prescriptions governing teens’ working and school attendance are vastly different. These rules give adolescents autonomy to make extraordinarily important decisions in those realms with little or no required input from parents and school officials. The teenage workforce is therefore a unique and significant social phenomenon.

\section*{C. The Youth Workforce}

In 2001, 3.7 million American adolescents between the ages of fifteen and seventeen worked.\textsuperscript{212} Large numbers of children under fifteen also worked.\textsuperscript{213} One study found employed high school students worked more than twenty hours per week.\textsuperscript{214} Boys typically averaged more hours of paid work than girls, especially in the later years of high school.\textsuperscript{215} While children from lower income families were less likely to work, when they did work, they tended to work more
hours. As might be expected, more children worked during summer months.

In 2001, as throughout the past decade, retail trades, such as department stores, groceries, restaurants, or retail outlets, employed about 60% of all working children. While paying somewhat more than the legally established minimum wage, these jobs typically provide few positive benefits to teenagers. Indeed, youth employment may cause more harm than good.

D. Morbidity & Mortality at Work

The weakness of child labor laws and their lax enforcement are dramatically illustrated by the physical damage sustained by working adolescents. Youth workers face the same workplace dangers as adults in similar occupations but are far less prepared to confront these hazards. Teens are “congregated in jobs that are characterized by the absence of opportunities for significant promotion,” low pay, high turnover, little on-the-job training, wide variation in hours, and few benefits. Jobs with these characteristics are, in general, more dangerous than other jobs. Young workers with limited education and low earning potential increasingly bear the burdens of evening and night hours. Agricultural work is particularly dangerous for young workers as well as adults, yielding fatality rates second only to mining.

216. Children in families with annual incomes below $25,000 worked an average of twenty-one hours a week in 2001, five more hours per week than children from higher income families. Id.; see also JEYLAN T. MORTIMER, WORK AND GROWING UP IN AMERICA 55-56 (2003).

217. In 2001, 30% of all children ages fifteen to seventeen worked during the summer, compared to 23% who worked in school months. GAO REPORT, supra note 9, at 13. These children worked more hours, an average of twenty-one hours per week in summer months, compared to sixteen hours per week in school months. Id.

218. Id. at 11 fig.2. Cashier is the most common job (16% of fifteen- to seventeen-year-olds), followed by cook, stock handler, bagger, and fast-food server. Id.

219. Children’s average hourly earnings in 2001 were $6.36 per hour. Id. at 13.

220. See supra Part IV.A-B.

221. Id. at 72-74. Many of the businesses that employ large numbers of adolescents — grocery stores, hospitals, nursing homes, and fast-food establishments — have higher than average injury rates for workers of all ages. GAO REPORT, supra note 9, at 28.

222. Daniel S. Hamermesh, Changing Inequality in Work Injuries and Work Timing, MONTHLY LAB. REV., Oct. 1999, at 22, 25, 29. Hamermesh asserts that studies focusing solely on earning inequality underestimate the growing inequality in the labor market because nonmonetary benefits in employment (like safety and regular hours) have also become more unequal over the last two decades. Id. at 29.

223. Janice Windau et al., Profile of Work Injuries Incurred by Young Workers, MONTHLY LAB. REV., June 1999, at 3, 5. During 1992-1997, approximately 40% of fatal injuries for youth workers occurred while performing agricultural work. Most of these deaths were related...
Although juvenile employees are protected by general statutes, such as the Occupational Safety & Health Act, they receive neither additional protections nor special allowances for their inexperience. Moreover, thousands of children work in the “underground” economy and other industries, where work is often performed by undocumented workers. Work in the home or in sweat shops often involves conditions and materials that increase the risk of accidents and other safety hazards. Not surprisingly, minors have higher injury rates than adult workers. More than 200,000 young people are hurt on the job annually. In 1999, 58,000 employees aged sixteen to nineteen reported occupational injuries that caused them to miss days from work.

The pattern of work-related fatalities for adolescents has remained the same over the past decade. Forty percent of children killed during the past decade worked in agriculture, primarily crop production. Retail trade and construction accounted for 20% and 14% of all fatalities, respectively.

There is good reason to believe occupational injury statistics for children substantially understate the extent of the problem. Two sources of nationwide data on work-related injuries exist that substantially differ in their estimates: (1) data collected by the Bureau of Labor Statistics (BLS) from employer records, and (2) data collected by the National Institute for Occupational Safety and Health (NIOSH) from emergency room records. These sources differ in their estimates of the number of working children hurt each year, the

231. BUREAU OF LAB. STATISTICS, OCCUPATIONAL INJURIES & ILLNESSES: COUNTS, RATES & CHARACTERISTICS, 1999 57 (U.S. GPO 2002). Injuries for workers less than sixteen years old are not reported.
232. GAO REPORT, supra note 9, at 20. However, from 1992 to 2000, “boys were almost eight times more likely to die as a result of a work-related injury than girls.” Id. at 21.
233. Id. at 23.
234. Id. at 22.
235. Id. at 26.
236. Id.
types of injuries sustained, and trends over time. In 1999, for example, BLS reported 13,000 were hurt on the job, while NIOSH estimated that over 80,000 were injured while working. BLS statistics report only incidents serious enough to require at least one missed day of work; thus, many injuries remain unreported. Moreover, because most children work part-time, they may not have been scheduled to work the day following the injury. BLS does not collect data on many employed children. The NIOSH emergency department data also underreports injuries because children who are hurt may not inform hospital staff that their injuries are work related, may be treated at the doctor’s offices rather than in the emergency department, or may not be treated at all.

Adolescent workers age sixteen and older suffer the great majority of work-related injuries. During the 1990s, 84% of youths were injured in the retail trade and service industries — the two industries in which young workers are most likely to be employed. Those working in eating and drinking places, food stores, general merchandise stores, and health services had the largest numbers of injuries. Working teens are also at high risk for highway accidents.

E. Negative Academic & Nonacademic Results

Limited employment — twenty hours or less per week during high school — is associated with reduced high school dropout rates, increased involvement in school activities, and higher grade point averages. In contrast, high-
intensity work correlates with numerous negative educational results. \textsuperscript{250} For example, truancy and suspension rates increase as a student works more hours.\textsuperscript{251} Moreover, the adverse educational effects of early high-intensity employment extend far beyond high school,\textsuperscript{252} hindering postsecondary educational achievement.\textsuperscript{253}

Adolescents engaged in high-intensity work, particularly those from lower socioeconomic groups,\textsuperscript{254} are also at an increased risk for numerous nonacademic detriments.\textsuperscript{255} The Institute of Medicine, the research arm of the National Academy of Sciences, concluded after a lengthy study that “high intensity work . . . is associated with unhealthy and problem behaviors . . . .”\textsuperscript{256} Numerous factors contribute to this association of work and negative behaviors,\textsuperscript{257} including: (1) most adolescent jobs, especially in fast-food

\begin{itemize}
  \item \textsuperscript{250} The term “correlation” rather than causation is used here. There is much debate surrounding the casual connection between negative teen behavior and work. Like most social science propositions and data, great controversy surrounds the appropriate variables to be considered and the conclusions to be drawn. Methodology is always an issue.
  \item \textsuperscript{251} Rothstein, supra note 16, at 28; see also Myriam L. Baker et al., Truancy Reduction: Keeping Students in School, JUV. JUST. BULL., Sept. 2001, at 1 (noting that the number of days a student is absent increases with the number of hours worked); Sheila Heaviside et al., Violence and Discipline Problems in U.S. Public Schools, 1996-97, in NAT’L CTR. FOR EDUC. STAT., STATISTICAL ANALYSIS REPORT 14 (1998); Press Release, U.S. Dept. of Educ., America’s Annual Progress Report on Education Provides Mixed Results (May 31, 2002), available at http://www.ed.gov/PressReleases/05-2002/05312002.html [hereinafter America’s Annual Progress Report].
  \item \textsuperscript{252} The majority of the students who worked twenty hours per week or less had received some college education by the age of thirty, while those who worked more than twenty hours per week were less likely to have achieved any college education before that age. Rothstein, supra note 16, at 31.
  \item \textsuperscript{253} PROTECTING YOUTH AT WORK, supra note 17, at 117.
  \item \textsuperscript{254} See generally John Paul Wright et al., Working While in School and Delinquent Involvement: Implications for Social Policy, 43 CRIME & DELINQ. 203 (1997).
  \item \textsuperscript{255} There is an enormous literature on adolescent risk-taking behavior and its connection to employment. See, e.g., PROTECTING YOUTH AT WORK, supra note 17, at 2; Laurence D. Steinberg & Sanford M. Dornbusch, Negative Correlates of Part-Time Employment During Adolescence: Replication and Elaboration (1990); Barbara McMorris & Christopher Uggen, Alcohol and Employment in the Transition to Adulthood, 41 J. HEALTH & SOC. BEHAV. 276 (2000); Jeylan T. Mortimer & Monica Kirpatrick Johnson, New Perspectives on Adolescent Work and the Transition to Adulthood, in NEW PERSPECTIVES ON ADOLESCENT RISK BEHAVIOR 425-96 (Richard Jessor ed., 1998); Rothstein, supra note 16, at tbl. 3.
  \item \textsuperscript{256} PROTECTING YOUTH AT WORK, supra note 17, at 3.
  \item \textsuperscript{257} The interrelation between work hours, paid jobs, and good and bad leisure activities is controversial. Some researchers suggest that for many adolescents early problem behaviors are time limited and are generally unlikely to snare young people in long-term problem behaviors. Some of the “bad” leisure activities associated with intensive work hours in high
school become more common in young adulthood for youth who work less intensively during adolescence. For example, these young people begin to catch up with their more precocious peers in alcohol use and binge drinking. McMorris & Uggen, supra note 255.

259. When adolescents are unable to balance the role of student and worker, for example, their grades suffer and their drinking increases. McMorris & Uggen, supra note 255, at 279; Deborah Safron et al., Part-Time Work and Hurried Adolescence: The Links Among Work Intensity, Social Activities, Health Behaviors, and Substance Use, 42 J. HEALTH & SOC. BEHAV. 425, 425 (2001).

F. Sexual Harassment

Another danger facing children in the workforce is sexual harassment, which is a form of prohibited sex discrimination. Two types of actionable claims are recognized in the federal courts: (1) “quid pro quo” harassment, and (2) “hostile work environment.” To establish either of these claims, youth employees must prove that they were subject to unwelcome sexual conduct that was based on sex. The latter element is usually self-evident. On the other hand, proving that the conduct was unwelcomed is generally difficult and may especially present a major hurdle for young female workers. Conduct is

258. Id. at 65. Quid pro quo is the “conditioning of concrete employment benefits on sexual favors.” Id. at 62. Hostile work environment claims involve conduct sufficiently severe to interfere with an individual’s job performance, or the creation of an “intimidating, hostile, or offensive working environment.” Id. at 65.

264. See, e.g., Meritor Sav. Bank, 477 U.S. at 68 (“The gravamen of any sexual harassment claim is that the alleged sexual advances were ‘unwelcome.’ . . . [T]he question whether particular conduct was indeed unwelcome presents difficult problems of proof and turns largely on credibility determinations committed to the trier of fact . . . .”).
unwelcome if the juvenile did not request or invite it and “regarded the conduct as undesirable or offensive.”

More than one-half of the contemporary teen workforce are adolescent girls. The 1990s brought increased awareness of sexual harassment and its effects on victims. Claims filed with state and federal agencies and in courts increased dramatically. Although harassment may sometimes lead to physical injury, its impact is more often emotional and psychological. Embarrassment, shame, fear, and diminished self-image are common.

Sexual harassment of teen employees is pervasive. In 2002-2003, the Equal Employment Opportunity Commission (EEOC) filed sexual harassment suits involving teen employees against numerous restaurants including Denny’s, Church’s Chicken, and a company running thirty-seven Burger King restaurants. From January to September 2003, the EEOC’s San Francisco office brought 541 claims on behalf of minors, 99% of which involved sexual harassment.

Young female employees are especially vulnerable to sexual harassment. They almost invariably earn little and are at the bottom of the workplace hierarchy. Adolescents lack the coping mechanisms of adults under stress, especially when social norms promote undesirable behavior. Simply because a young female worker does not object to the conduct should not necessarily

265. Henson v. City of Dundee, 682 F.2d. 897, 903 (11th Cir. 1982).
267. In 1992, for example, 10,532 sexual harassment claims were filed with the federal Equal Employment Opportunity Commission (EEOC) and state fair employment agencies. Martha S. West, Preventing Sexual Harassment: The Federal Courts’ Wake-up Call for Women, 68 Brook. L. Rev. 457, 457 n.3 (2002). By 2000, that number had increased to 15,836. Id.
271. Id.
272. Many youth workers, for example, are paid a subminimum wage. 29 C.F.R. pt. 520 (2003).
mean that she welcomed the behavior.\textsuperscript{274} Teens are far more likely to accede to
the advances, quit their jobs, or seek help from peers than seek legal recourse
or invoke corporate remedies.\textsuperscript{275}

Courts have often rejected Title VII claims against employers without
sufficient sensitivity to the reasonableness of juveniles’ actions because of their
developmental stage. For example, in \textit{Reed v. MBNA Marketing Systems, Inc.},\textsuperscript{276} the court found neither the minor employee’s age, nor her asserted
reasons, including embarrassment and intimidation, excused her delay in
reporting harassing comments and actions.\textsuperscript{277} In \textit{Madrid v. Amazing
Pictures},\textsuperscript{278} a store manager and his replacement consistently made statements
regarding a young female worker’s anatomy.\textsuperscript{279} She was told that if she would
lift up her shirt, she would attract more sales.\textsuperscript{280} The court dismissed the claim,
finding she unreasonably failed to take advantage of preventative or corrective
opportunities.\textsuperscript{281} In cases like these, the courts failed to consider sufficiently not
only the relationship of youthful workers to supervisors, but also teens’
developmental phase. At least one court has more appropriately acknowledged
that “[a] reasonable person is likely to feel particularly helpless and humiliated
when harassed by a supervisor three times her age and the highest in command
at her work location.”\textsuperscript{282} Courts should also recognize that the effect of
harassment is likely to be more severe in the case of juveniles than adults;
depression, academic deficiencies, and emotional and psychological problems
often result.\textsuperscript{283}

\begin{itemize}
\item \textsuperscript{274} Lipsett v. Univ. of P.R., 864 F.2d 881, 898 (1st Cir. 1988) (noting that in some cases,
a person may be obliged to tell the harasser directly that the conduct is unwelcome, while in
others, consistent failure to respond may be sufficient); see also Carr v. Allison Gas Turbine
Div., 32 F.3d 1007, 1011 (7th Cir. 1994) (stating that cursing and dirty jokes by female
employee does not show she welcomed the harassment).
\item \textsuperscript{275} One seventeen-year-old employee finally quit after enduring numerous comments
about her physical appearance and being forced to perform oral sex on her supervisor. Reed
with the company the following spring, was assigned to work under the same supervisor, and
only then reported the sexual harassment to the company. \textit{Id.} at 368. The company’s
investigation revealed that the supervisor had also engaged in sexual relations with another
underage employee. \textit{Id.}
\item \textsuperscript{276} 231 F. Supp. 2d 363 (D. Me. 2002).
\item \textsuperscript{277} Without discussing the plaintiff’s age or vulnerability, the Court refused to “excuse
Plaintiff from following the procedures adopted for her protection.” \textit{Id.} at 375.
\item \textsuperscript{279} \textit{Id.} at *3.
\item \textsuperscript{280} \textit{Id.} at *4.
\item \textsuperscript{281} \textit{Id.} at *11.
\item \textsuperscript{282} Ibrahim v. Holidays Inn, Inc., No. 95 C 4316, 1996 WL 199743, at *8 (N.D. Ill. Apr.
23, 1996).
\item \textsuperscript{283} Mary M. v. N. Lawrence Cmty. Sch. Corp., 131 F.3d. 1220, 1226 (7th Cir. 1997)
\end{itemize}
Courts should provide stronger protection to young employees. In these harassment cases, the fact that the advances were welcomed is a legal defense for the defendant, but there should be a strong presumption that sexual conduct between an adult worker — particularly a supervisor — and a juvenile employee is not consensual. A more realistic approach is illustrated in *EEOC v. R&R Ventures*, where the court found the conduct of a Taco Bell manager sufficiently severe to create a hostile working environment. The manager made sexual jokes and discussed sexual experiences and positions with a fifteen-year-old employee. He also commented on her breasts and buttocks, causing her to develop an eating disorder to avoid drawing attention to her body. The court declared:

> Here the severity of [the manager’s] sexual misconduct was compounded by the context in which it took place. Throughout his campaign of torment, Wheeler was an adult male in a supervisory position over young women barely half his age. And he is alleged to have engaged in a systematic effort to cripple the self-esteem of the teenagers who assisted him at the store.

*EEOC v. R&R Ventures* sets a standard to protect minors from exploitative sexual encounters, although more regulation is obviously necessary to ensure consistent application of sexual harassment laws in youth employment lawsuits.

V. The Case for Change

A. The Inadequacy of the Current Legal Regime

1. Federal Law

   a) Statutory Failings

       While the FLSA provides some regulation of child labor, it is far from comprehensive. Of necessity, the Act applies only to goods that move in interstate commerce. Accordingly, many smaller businesses, door-to-door

---

(noting that “harassment has a greater and longer lasting impact on its younger victims”).

286. Id. at 340.
287. Id. at 337.
288. Id.
289. Id. at 340.
290. To be included, employers must meet either (1) an “enterprise” test; or (2) an “employer” test. 29 U.S.C. § 203(s) (2000). The “enterprise” test depends on the company’s gross volume of sales; currently, minimum annual sales revenue of $500,000 is required. Id.
sales, and other economic activities in which children are employed are not covered.291 In many instances, this work — selling newspapers or other items locally — is relatively innocuous. But often children are recruited for sales crews that travel considerable distances from home and extend overnight or beyond.292 A series of exemptions exclude large numbers of children from the Act even where the business activities affect interstate commerce.293 The FLSA also distinguishes between farm and nonfarm employment, greatly disadvantaging children in agriculture.294

Federal law has failed to keep pace with the enormous increase in the number of children working and the variety of jobs they perform. While the FLSA has been amended numerous times since its enactment in 1938,295 its major provisions have remained substantially unchanged.296 It does not require that working youths have a work permit or certificate297 and only restricts the hours of employment for minors who are under sixteen.298 The DOL has no statutory authority to regulate the number of hours or the time sixteen- and seventeen-year-olds may work.299 These adolescents may be compelled to work long hours and late into the night, conditions almost certain to impair their studies.300

§ 203(s)(ii). Under the “employer” test, there must be a showing of significant impact by either the business or the affected employee on interstate commerce. Id. § 203(s)(i).

291. Many smaller businesses would likely be under the $500,000 annual sales requirement of 29 U.S.C. § 203(s).

292. The Traveling Sales Crew Protection Act, S. 1989, 106th Cong. § 101(e) (1999), sought to amend the state labor laws to prohibit any kind of door-to-door sales or related work that requires employees under eighteen to remain away from home for more than twenty-four hours. No action was ever taken on this measure.

293. For example, children employed by a parent, in street trades, etc., are not covered. 29 U.S.C. § 213 (2000).

294. See infra Part V.A.1.b (discussing youth labor in agriculture).

297. The DOL, however, accepts state-issued work permits and certificates as proof of age. If a state does not issue permits or certificates, the DOL will issue age certificates on request. U.S. GAO, WORK PERMIT AND DEATH AND INJURY REPORTING SYSTEMS IN SELECTED STATES 2 (1992).

300. The court in Schmidt declared:

Although we share the plaintiff’s concern about the plight of full-time students compelled to labor late into the night and to work hours almost certain
This situation is even more egregious given that many of these working teens are already doing poorly in school. Many choose work over their studies, despite the critical role education plays in achieving economic and other success in society.

While federal labor law prohibits the employment of sixteen- and seventeen-year-olds in occupations found “hazardous or detrimental” to their health and well-being, these designations have not been changed since 1975 despite new technologies, changing work conditions, and a vastly different work force. Moreover, in jobs deemed “hazardous” by the DOL, if employers fall outside the jurisdiction of the FLSA, youth workers receive no protection from federal law. Despite the large number of workplace accidents, federal law does not require youth workers to be provided with safety training before starting a job. Employed youths are not required to have adult supervision. Notably, 41% of workplace deaths occur while an adolescent is doing work prohibited by federal child labor laws.

In addition, the FLSA provides no federal remedy for youths injured while working in prohibited jobs. In Breitwieser v. KMS Industries, Inc., for example, a sixteen-year-old boy was crushed to death by the forklift he was operating. The Secretary of Labor had previously declared the operation of forklifts a “particularly hazardous” occupation. Under the Georgia Worker’s...

Compensation statute in effect at the time, the amount of recovery given to beneficiaries of deceased workers with no dependents was $750. The Fifth Circuit Court of Appeals refused to imply a cause of action from the FLSA, despite the obvious inadequacy of the state worker compensation award. The court found that the Act already contained a “comprehensive enforcement scheme.” Consequently, the FLSA provided no money damages for death. Most young workers, of course, have no spouse or dependents and thus the death of a minor worker often provides minimal compensation to the parent. Even if willful misconduct or gross negligence by the employer results in injury, federal law provides no remedy for the victim.

b) Child Labor in American Agriculture

The original FLSA excluded agriculture to protect “family farms,” where child labor was necessary. Today, the agriculture industry is big business, and migrant farmworkers are among the poorest people in the country.

319. See generally Jean M. Glader, A Harvest of Shame: The Imposition of Independent Contractor Status on Migrant Farmworkers and Its Ramifications for Migrant Children, 42 HASTINGS L.J. 1455 (1995). Further, migrant farmworker families often “have no homes or live in overcrowded and unsanitary housing. . . . Their children, who often work in the fields, are exposed to the same poor conditions and may be more susceptible to health risks.” U.S. GAO, HIRED FARM WORKERS: HEALTH AND WELLBEING AT RISK 2, 3, 8 (1992) [hereinafter HIRED FARM WORKERS]. The average family earns less than $10,000 per year. 145 CONG. REC. E2303-02 (daily ed. Nov. 8, 1999) (statement of Rep. Lantos).
Hundreds of thousands of youth, often at very young ages, work legally in agriculture. These youth farmworkers work long hours, before and after school, perform arduous physical labor, and risk illness, exposure to pesticides, serious injury, and permanent disability. Of work-related deaths in employees under eighteen, 41% occurred in agriculture and a staggering 20% were child farmworkers thirteen years of age or younger.

Today, most of the FLSA’s modest restrictions exempt children working in agriculture. No maximum hour restrictions are imposed. Regardless of the number of hours a child works in agriculture, the employer need not pay overtime. As long as the farm work is merely “hazardous” and not “particularly hazardous,” youths over sixteen may perform the work. Fourteen-year-olds are permitted to work in agriculture any time outside of school hours. The FLSA allows children ages twelve to thirteen to work with parental consent or if their parents are employed on the same farm, or if working for a member of their immediate family. Migrant-worker parents are often classified as independent contractors; thus children are not considered an employee of the grower-employer and are not protected by the FLSA. “To characterize the migrant worker as an independent business person...

323. GAO REPORT, supra note 9, at 23.
325. See id. § 213 (b)(12).
326. Id. § 213(a).
327. Id. § 213(c)(2) (emphasis added).
328. The FLSA child labor restrictions do not apply to employees “fourteen years of age or older.” Id. § 213(c)(1)(C).
329. FLSA exempts child labor restrictions for employees under the age of twelve who are employed (1) by their parents, (2) with their parents’ consent, or (3) on the same farm as their parents. Id. § 213(c)(1)(A)-(B). A child of twelve or thirteen needs only the consent of a parent to work on a farm, even if working conditions are “hazardous” or “oppressive”; for children over fourteen, parental consent is unnecessary. Id. § 213(c)(1)(C).
330. Id. § 213(a)(6)(B). For example, the head of a family may contract with a farm owner to harvest a particular field and pay the family a portion of the profits from that field. See Donovan v. Brandel, 736 F.2d 1114, 1116 (6th Cir. 1984).
freely with the grower is an extremely inaccurate portrayal . . . [C]haracterizing migrant child workers as children ‘helping out’ on the family farm or in an independent business operation is pure fiction.\textsuperscript{331} The life expectancy of a child agricultural worker is forty-nine years, and 45\% of these workers drop out of school.\textsuperscript{332}

Challenging a grower’s practice of employing children requires a court or an administrative law judge (ALJ) to determine whether the child is an “employee” under the FLSA and whether the child’s parent is an independent contractor.\textsuperscript{333} The court or ALJ makes this determination on a case-by-case basis considering the circumstances of each situation, which results in uncertainty and inconsistency.\textsuperscript{334} Lengthy litigation is required to address an immediate problem.\textsuperscript{335}

Because many farmworkers’ pay is based upon the amount of produce harvested,\textsuperscript{336} young children are used frequently to supplement the family’s income even when absence from school, exposure to pesticides, and exposure to dangerous farm equipment results. The federal Environmental Protection Agency, which regulates pesticides and its uses, has estimated that hired farmworkers suffer up to 300,000 acute illnesses and injuries from exposure each year.\textsuperscript{337} A 1990 survey of Mexican-American children working on New York farms reported that “almost half had worked in fields still wet with pesticides and over a third had themselves been sprayed.”\textsuperscript{338}

c) Enforcement Deficiencies

The FLSA’s child labor enforcement provisions are weak. Although the FLSA provides for criminal penalties, a “one free bite” rule is in effect; thus,
employers may be jailed only if they have a prior conviction for breaking child labor laws.\textsuperscript{339} Between 1988 and 2004, no employer faced criminal prosecution.\textsuperscript{340} In stark contrast to the minimum-wage and maximum-hour provisions of the FLSA and most civil rights statutes, federal law gives no private right of action for violation of the child labor provisions and makes no provision for attorney fees.\textsuperscript{341} The most affected parties — aggrieved minor employees and their parents — are thus unable to sue as “private attorneys-general.”

Enforcement is thus left entirely to administrative processes. There are fewer than one thousand federal wage-and-hour compliance officers to enforce the FLSA\textsuperscript{342} and numerous other statutes. In comparison, the Fish and Wildlife Service has 12,000 inspectors.\textsuperscript{343} The DOL’s resources have declined by 23% in the past twelve years,\textsuperscript{344} despite the growth in the workforce.\textsuperscript{345} Even when inspections revealed violations, 43% of businesses charged with FLSA violations had their fines reduced.\textsuperscript{346} The Government Accounting Office

\textsuperscript{341} 29 U.S.C. § 216 explicitly provides adult employees with a cause of action, including a class action, for unpaid minimum wages and overtime compensation plus liquidated damages. Attorney’s fees and costs are also authorized, thus encouraging lawyers to handle these cases. See 29 U.S.C. § 211. This pattern is repeated in numerous other civil rights statutes. See, e.g., Age Discrimination in Employment Act, 29 U.S.C. § 626(b); Title VII of the 1964 Civil Rights Act, 42 U.S.C. § 2000e-5(k) (2000); Civil Rights Attorney’s Fees Awards Act, 42 U.S.C. § 1988.
\textsuperscript{342} GAO REPORT, supra note 9, at 38. The Children’s Act for Responsible Employment of 2001, H.R. 2239, 107th Cong. § 6(1), would have added “at least 100 additional inspectors within the Wage and Hour Division . . . for the principal purpose of enforcing compliance with child labor laws.” Id. It also would have provided a 10% increase in the budget of the Solicitor of Labor for prosecution of child labor violations. Id. § 6(2). The bill died in committee.
\textsuperscript{343} LEVINE, supra note 88, at 6.
\textsuperscript{344} A decade ago, the National Safe Workplace Institute, a nonprofit group funded by foundations and corporations, estimated that “a business can expect a visit by a federal labor inspector once every 50 years.” Bryan Dumaine, Illegal Child Labor Comes Back, FORTUNE, Apr. 5, 1993, at 86.
\textsuperscript{346} Stephanie Armour, Danger: Underage Teen Workers Face Risks on the Job, But Does the Government Do Enough to Protect Them?, USA TODAY, Dec. 23, 1998, at 1B.
(GAO) found DOL district officials “sometimes reduced the penalties for child labor violations or did not assess any penalties.”

The GAO Report also criticized the Wage and Hour Division (WHD) for failing to provide adequate training to its regional and district offices on how to obtain information from the agency’s database to use in targeting child labor compliance efforts.

The DOL consistently understates the problems of child labor. The DOL has estimated fewer than 10,000 children working in violation of federal laws in every year since 1994. In a recent, thorough study, Professors Kruse and Mahony, using the Current Population Survey (CPS) and other sources, estimated that businesses employ 154,000 children in violation of federal or state labor laws in an average week; 301,000 children are illegally working during a year. Most children working in violation of the FLSA are under sixteen years old and work an average of ten hours more than allowed by law. They also work in prohibited industries and occupations. In 2001, as in the past, “minority children and children from families with annual incomes below $25,000 were more likely than other children to work illegally.”

 Teens unlawfully employed in hazardous jobs earn, on average, $1.38 less per hour than lawful workers in the same occupations. When combined with savings derived from employing youths for excessive hours, illegal child labor results in employer cost savings of roughly $136 million per year.

Since 1990, the number of enforcement actions, penalties assessed, and number of children found illegally employed by the DOL have all dropped significantly. In 1990, the DOL found 5889 child labor law violations

347. GAO REPORT, supra note 9, at 45.
348. Id. at 45-46.
349. Id. at 37.
351. GAO REPORT, supra note 9, at 15-16. Professors Kruse and Mahoney found that 10.7% of working fifteen-year-olds were working in violation of child labor laws. Kruse & Mahoney, supra note 350, at 22. They estimate 110 million illegal hours worked by children every year. Id. at 21. These statistics are based on data collected by the CPS, which tends to undercount rather than overcount illegally employed children. Id. at 19-20. Their report includes data from National Longitudinal Surveys on Youth and Adolescent Health and takes into account differences between summer months and the school year. Id. at 21.
352. For example, in 2001, although only 3% of all children worked in manufacturing, this industry accounted for 14% of illegally employed children. GAO REPORT, supra note 9, at 12. Similarly, although only 3% of all working children worked in construction, they accounted for 16% of all illegally employed children. Id. at 16.
353. Id. at 10.
354. Kruse & Mahoney, supra note 350, at 32.
355. Id. at 33.
356. GAO REPORT, supra note 9, at 37.
involving 39,790 illegally employed children;\textsuperscript{357} $8.5$ million was assessed in penalties.\textsuperscript{358} In 2003, only 1648 cases were initiated, 7228 minors were found unlawfully employed, and less than $5$ million was assessed in penalties.\textsuperscript{359} The fines imposed have been small, with the average penalty in 2001 being just over $3000.\textsuperscript{360} Even these figures may be exaggerated because the DOL often settles cases for much less than what was assessed.\textsuperscript{361} The total fines imposed for child labor violations in 2001 were one-half the amount assessed in 1991.\textsuperscript{362}

Lack of federal enforcement is particularly egregious in the agricultural industry. The statistics are themselves instructive. In 1990, the DOL reported only 138 cases of child labor violations.\textsuperscript{363} In 1993, the DOL reported fifty-four cases with violations involving 146 farm children,\textsuperscript{364} and in 1997, it reported fourteen cases with violations involving twenty-two children.\textsuperscript{365} In contrast, others estimate over a million child labor violations and 100,000 minors working illegally on farms each year.\textsuperscript{366}

2. State Laws

\hspace{1em}a) Child Labor Laws

Working children typically fare no better under current state child labor laws, which generally track the FLSA. State statutes, however, apply in the many instances when the FLSA is silent or inapplicable to a particular employment situation.\textsuperscript{367} The major issues covered by state child labor laws include: (1) the type of work children may perform, (2) minimum age, (3) number of hours and

\end{itemize}
time of work, (4) involvement in decision making by responsible adults, (5) legal remedies after injury, and (6) administrative enforcement of existing rules.

Federal law is generally more stringent than state law in defining “hazardous work,” which is barred for juveniles. Federal regulations explicitly define hazardous occupations. See, e.g., 29 C.F.R. § 570.51 (2004) (explosive manufacturers); id. § 570.52 (vehicle drivers); id. § 570.53 (coal mining); id. § 570.54 (logging and mill operations); id. § 570.55 (power-driven woodworking); id. § 570.57 (places with radioactive substances); id. § 570.58 (power-driver hoists); id. § 570.59 (metal punch); id. § 570.60 (mining other than coal); id. § 570.61 (meat packing or processing); id. § 570.62 (bakery); id. § 570.63 (paper processing); id. § 570.64 (manufacturing of tile, bricks, etc.); id. § 570.65 (circular saw, band saws, and guillotine shears); id. § 570.66 (wrecking and demolition); id. § 570.67 (roofing); id. § 570.68 (excavation).

370. Alabama, Delaware (nonhazardous employment), Georgia, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Montana, Nebraska (work in beet fields), North Carolina, Oklahoma, Rhode Island, Tennessee, Texas, West Virginia, and Wyoming.

minors under sixteen to work forty hours or more per week while attending school. 373 Connecticut is the only state that completely bans work for children under age sixteen during the school term. 374 Some states impose limits on the amount of combined school and work hours in a day or week. 375 Thirty states prohibit night work after 7:00 p.m., 376 while thirty-three do not allow work before 7:00 a.m. 377

Federal law requires no consent from parents or school authorities for children to work.378 State law, although varied, follows this pattern of giving parents little legal control over the child’s decision to work. Only nineteen states require parental consent for children under sixteen years old to work.379 Only twelve require consent by parents for sixteen- and seventeen-year-olds to work.380

Under the FLSA, no limitations exist on hours worked by sixteen- and seventeen-year-olds, and many states’ laws are similar. Thirty-one states allow these teens to work without an employment or age certificate.381 Thirty-six states permit forty hours or more of work while school is in session.382 Arkansas, for example, restricts children to fifty-four hours per week during school.383 Notably, only four states limit the employment of sixteen- and seventeen-year-olds to five hours or less of paid work during a school day.384 Twenty-eight states impose no restrictions on the amount of work time on

378. The DOL accepts state-issued work permits and certificates as proof of age. If a state does not issue permits or certificates, the DOL will issue age certificates on request. U.S. GAO, WORK PERMIT AND DEATH AND INJURY REPORTING SYSTEMS IN SELECTED STATES 2 (1992).

school days. Thirty-one states have no upper limit on the amount of hours per day, hours per week, or days per week that minors may work during school vacation.

Administration of state child labor laws is generally poor. A 2002 survey by the Child Labor Coalition found that in the thirty-nine states responding, a total of only 528 inspectors — an average of fourteen per state — were responsible for enforcing all state labor laws, including child labor. Twenty-two jurisdictions have ten or fewer compliance officers. Only three states have twenty-five or more compliance officers; only six have inspectors who are exclusively responsible for monitoring child labor laws. Twelve jurisdictions conducted fewer than one hundred inspections of workplaces. Some state agencies have statutes with no penalties for violation or no enforcement authority. The amount collected for state child labor violations was often trivial. In many instances, where an employed minor is fatally injured in the workplace while working illegally, the only penalty is criminal, and in many states even this is not available.

b) Workers’ Compensation
When youths are injured on the job, state workers’ compensation systems

396. Id.
often provide the exclusive remedy. These statutes grant employers immunity from tort actions by injured employees in exchange for limited compensation for injuries that arise out of and in the course of employment. The benefits that injured employees usually receive are typically meager — one-half or two-thirds of employees’ average weekly income plus hospital and medical costs. In contrast, the employers’ total cost for compensation insurance is a small fraction of their total payroll. Employers are liable for only these small amounts because compensation systems often ignore the problems of long-term disability, occupational disease, and worker rehabilitation. These problems are particularly acute for young workers injured on the job. In addition, workers’ compensation awards may be less for young workers because they are more likely to work part-time, earn lower wages, lack dependents, and be illegally employed.

Workers’ compensation awards are generally based on a percentage of employees’ average weekly wages, termed the “wage basis.” Minors’ current earnings are likely to be for part-time work and at a low wage rate; thus, youth

---

397. 1 Arthur Larson & Lex Larson, Workers’ Compensation Law § 66.02 (Matthew Bender 2004) [hereinafter Larson’s Workers’ Comp.].

398. Courts must often construe a workers’ compensation statute to determine whether an injured minor is a covered “employee” or “worker.” See, e.g., Allisory v. Employer’s Temp. Serv., Inc., 277 N.W.2d 340 (Mich. Ct. App. 1979) (stating that a minor employed in violation of labor statute may not bring negligence action against employer); Danev v. Meldrom Mfg. & Eng’g Co., 252 N.W.2d 255 (Minn. 1977) (same). Other courts have barred common law actions against employers where there was a statutory presumption that a minor was to receive benefits under the statute unless a parent or guardian gave notice to the contrary before the accident. See, e.g., Evans v. Allentown Portland Cement Co., 252 A.2d 646 (Pa. 1969) (barring negligence action by minor against employer because minor did not opt out of statutory provisions).

399. Larson’s Workers’ Comp., supra note 397, § 1.03[5].

401. Id.

402. 3 Larson’s Workers’ Comp., supra note 397, § 66.02.

403. 5 id. § 93.01[1][a]. The most common approach to determining the wage basis consists of three factors. First, if claimants have substantially worked in this type of employment for the entire preceding year, their wage basis is simply the average wage for that year. Id. Second, if the employee did not work substantially in that job for the preceding year, then the wage is that of the same “class” of worker in the same or a nearby location. Id. If neither of these two methods can fairly be applied, then the weekly wage is set at a level that “shall reasonably represent the annual earning capacity of the injured employee.” Id. This third catch-all provision is employed only if neither of the first two methods can be fairly or reasonably applied. Id. § 93.01[1][c].
workers tend to receive small awards. Workers’ compensation awards are often increased if the employee has dependents, an unlikely scenario for minors. Other worker compensation factors disadvantage subgroups of child workers. Many youth laborers are classified as illegally employed because of the hours or types of work they perform. While many workers’ compensation statutes cover both legally and illegally employed minors, some states make eligible only those youths lawfully employed. Although children working in agriculture are exposed to many hazards, they often do not receive worker compensation protection because the classification of migrant workers as “independent contractors” means children often are not considered “employees.”

**c) Compulsory School Attendance Laws**

States have *parens patriae* power to limit parental freedom — and the child’s decision making — when those choices might endanger the welfare of children. For example, all states now have some compulsory school attendance laws. However, these are far too lenient to ensure appropriate decision making regarding work and education.

Massachusetts passed the first compulsory school attendance law in 1852. The movement for mandatory education provided a powerful rationale to restrict child labor. Until the turn of the century, however, states generally did not enforce compulsory attendance laws and child labor restrictions. Between 1890 and the 1930s, however, American education systems grew, new techniques of bureaucratic control emerged, and legislatures passed stronger laws, giving school officials sophisticated new techniques to bring truants into schools. By the time of the Great Depression, most states were requiring youth

---

404. See id. § 93.02[2][d]. For example, in *Mabry v. Bowers’ Implement Co.*, 269 S.E.2d 165 (N.C. Ct. App. 1980), a high school student was killed on the job. To determine his wage basis, the court averaged Mabry’s forty-one weeks of part-time employment and eleven weeks of full-time employment. *Id.* at 168.

405. 3 *Larson’s Workers’ Comp.*, *supra* note 397, § 66.02[1].

406. *Id.* (see, for example, Wyoming, Oklahoma, and Vermont); see also Nina Krauth, Comment, *Do Farmers Reap More Than Their Child Laborers Sow? The Conflict Between the Fair Labor Standards Act and State Workers’ Compensation Laws*, 5 *SAN JOAQUIN AGRIC. L. REV.* 213, 221 (1995).

409. *Urban & Wagoner, supra* note 81, at 173.

to attend some high school, and current mandatory education laws were in place.411

When examined in detail, particularly in light of the weaknesses of the child labor laws, contemporary school compulsory attendance laws impose few important restrictions on the decision to work. These statutes allow early withdrawal from school and often give parents little legal leverage over the decision to drop out. Fewer than one-third of states require attendance until the age of eighteen.412 Seven of these — Connecticut, Indiana, Louisiana, New Mexico, Oklahoma, Virginia, and Washington — except students who obtain parental consent to withdraw from education.413 Only six states require school attendance until the age of seventeen.414 In twenty-seven states, students may leave school at sixteen.415 Astonishingly, in twenty-two of these states, no parental consent is required.416 Only Arizona, Kentucky, Minnesota, New Hampshire, and Rhode Island require parental consent for a sixteen-year-old student to leave school at sixteen.417

412 See infra App. A.
414 See infra App. A.
child’s withdrawal from school.\textsuperscript{417} Thus, work and schooling truly are outlier instances of juvenile autonomy.

\textbf{B. Prescriptions for Improvement}

The Child Labor Coalition (CLC), an advocacy organization, drafted a Model State Child Labor Law, which addresses many of the shortcomings of current federal and state law.\textsuperscript{418} The model statute equalizes legal protection of children in agriculture with those in other industries\textsuperscript{419} and sets the minimum work age at fourteen.\textsuperscript{420} The CLC proposal recognizes the important link between education and employment; high-intensity work is discouraged by limiting the maximum number of hours an adolescent can work based on age and school term.\textsuperscript{421} Fourteen- to fifteen-year-olds are restricted to a maximum fifteen hours of work when school is in session and thirty hours when school is not in session;\textsuperscript{422} sixteen- to seventeen-year-olds may work no more than twenty hours per week when school is in session and forty hours when school is not in session.\textsuperscript{423} The model legislation also requires a work permit for all employed minors,\textsuperscript{424} which needs parental consent as well as the signature of a school official.\textsuperscript{425} The permit may be revoked upon the recommendation of a parent, teacher, or guidance counselor if there is evidence of poor academic performance.\textsuperscript{426}

Other important improvements would result from adoption of the CLC model statute. The model statute would update the DOL’s “hazardous occupations”

\item \textsuperscript{419} \textit{Id.} The current FLSA draws a distinction between agricultural and nonagricultural labor and exempts children working alongside their parents in agriculture from child labor work restrictions. Nearly one-half of states have no minimum age for agricultural employment. \textbf{Child Labor Coalition, Executive Summary of the Model State Child Labor Law, at http://www.stopchildlabor.org/USChildlabor/modelstatelaw.htm} (last visited Aug. 17, 2004) \textit{[hereinafter CLC Exec. Summary]}. \textsuperscript{\textcopyright}
\item \textsuperscript{420} \textbf{CLC Model Law, supra} \textsection{note} 418, \textsection{3.}
\item \textsuperscript{421} \textit{Id.} \textsection{5-7.}
\item \textsuperscript{422} \textit{Id.} \textsection{6.}
\item \textsuperscript{423} \textit{Id.}
\item \textsuperscript{424} \textit{Id.} \textsection{9.}
\item \textsuperscript{425} \textit{Id.} Adolescents must also participate in labor education before entering the workforce. \textbf{CLC Exec. Summary, supra} \textsection{note} 419. At a minimum, a minor must read a booklet and pass a test to receive a work permit. \textit{Id.}
\item \textsuperscript{426} Many states now require some adult approval for child labor, but most only require permits for minors under sixteen and do not use the permits as an enforcement or educational tool. \textbf{CLC Exec. Summary, supra} \textsection{note} 419.
\end{itemize}
to reflect current workplace realities.\textsuperscript{427} Enhanced enforcement provisions include publicizing repeat and intentional child labor law violators and distributing the list to students, parents, employers, and educators.\textsuperscript{428} Moreover, the model statute would deposit fines imposed on violators in a fund to be used exclusively to further the purposes of child labor laws.\textsuperscript{429} In addition, the model statute would bar repeat violators from government grants, contracts, and loans for five years and prohibit violators from employing minors for five years.\textsuperscript{430}

There are numerous federal proposals to improve the existing legislation regulating child labor. Two bills seeking to amend the FLSA were introduced in Congress in the last three years.\textsuperscript{431} While there is little hope for enactment of these measures in the present political environment, the statutory changes would significantly improve the present legal structure.

Senator Harkin’s 2001 bill, “Children’s Act for Responsible Employment” (CARE),\textsuperscript{432} died without action. CARE would have deleted two current agriculture provisions\textsuperscript{433} and increased civil and criminal penalties. The Harkin bill would have permitted plaintiffs to recover reasonable attorney fees from defendants in child labor violation suits.\textsuperscript{434} CARE was referred to the Senate Committee on Health, Education, Labor, and Pensions on May 10, 2001 but was never considered.\textsuperscript{435}

In 2003, Representative Tom Lantos introduced the “Youth Worker Protection Act.”\textsuperscript{436} The Lantos legislation would have several positive effects on the current child labor situation in the United States. It would require work permits for minors\textsuperscript{437} and amend the FLSA to increase protection of migrant

\textsuperscript{430} Id. § 13(D).
\textsuperscript{432} S. 869, 107th Cong.
\textsuperscript{433} Id. § 2 (deleting 29 U.S.C. § 213(c)(2), allowing children under sixteen to work in occupations if employed by a parent, and 29 U.S.C. § 213(c)(4), allowing employers to petition for waiver to hire children under twelve to engage in hand harvest of crops for no more than eight weeks).
\textsuperscript{434} Id. § 4. Under CARE, employers would have to report job injuries or illnesses involving minors. Id. Finally, CARE contained a provision encouraging increased coordination between local and national governmental agencies. Id. § 5.
\textsuperscript{435} Bill Summary & Status for the 107th Congress, at http://thomas.loc.gov (last visited Nov. 30, 2004).
\textsuperscript{437} Id. § 203. The work permit application would require proof of age, parental consent,
agriculture labor.  Information gathering would be improved by requiring the federal government to compile data on both the types of occupations in which minors work and violations of child labor provisions. Employers would be required to report any serious work-related injury to the DOL. The Act would require the DOL to compile statistics on work permits and work-related injuries and report these annually to Congress. This legislation would also limit minors’ hours of work when school is in session. The Youth Worker Protection Act includes criminal penalties for employers who willfully violate child labor provisions, causing serious bodily injury or death to a minor employee. To improve enforcement, the Act would create a private cause of action and award attorney fees to plaintiffs who prevail in child labor violation claims. The Federal Register and the DOL website would also publish the names of willful violators of the child labor provisions.

VI. Conclusion

In the end, this Article returns to the very beginning. As President Franklin Roosevelt noted in 1937, there is “no justification” for the amount and results of child labor in the United States. Although some of the original abuses have been eliminated since 1937, others remain and new problems have emerged in the modern era. In some situations, minors and their families may legitimately make the choice to work. Young people may benefit from opportunities to acquire responsibility, compensation, and knowledge in the workplace. But

a statement that the minor is enrolled in school full-time, verification of school attendance, a description of the type of work to be performed, a summary of legal protections, and contact information for the relevant state agency. Id. The last two provisions would educate youth workers who are often unsophisticated about their legal rights.

438. Id. § 102.
439. Id. § 206.
440. Id. § 205.
441. Id.
442. Fourteen- to fifteen-year-olds would be permitted a maximum of three hours per day and fifteen hours per week; sixteen- to eighteen-year-olds would be permitted four hours per day and twenty hours per week. Id. § 204. The FLSA currently imposes no time restrictions on those over sixteen. In addition, fourteen- to fifteen-year-olds would be allowed to work only between 7:00 a.m. and 7:00 p.m. and sixteen- to eighteen-year-olds only between 7:00 a.m. and 11:00 p.m. Id. New restrictions on permissible workplaces would also be imposed; for example, youths under eighteen would be barred from paper baling, peddling, and seafood processing. Id. §§ 105-106, 203. “Peddling” includes the sale of goods or services in a public place, door-to-door, or from a vehicle (except newspaper delivery). Id. § 106(b).
443. Id. § 208(d). The maximum sentence for a first offense would be three years and five years for a second offense. Id.
444. Id. § 208(a).
445. Id. § 208(b).
these opportunities should create “social capital” — opportunities for later employment or education. The current legal rules, and administration of these rules, create enormous damage to American children, their families, and society at large. The subject of child labor elicits instinctive images of a problem long since solved in the United States and confined to the developing world. Yet it is these instinctive images and lack of political will that hamper reexamination of our current public policies. It is time to begin a public conversation about this unspoken tragedy.
APPENDIX A
Compulsory School Attendance Summary

1. Alabama
   a. Attendance is mandatory until the age of sixteen. ALA. CODE § 16-28-3 (1975).

2. Alaska
   a. Attendance is mandatory until the age of sixteen. ALASKA STAT. § 14.30.010 (Michie 2002).

3. Arizona
   a. Attendance is mandatory until the age of sixteen. ARIZ. REV. STAT. ANN. § 15-802 (West 2002).
   b. Noted exceptions:
      i. Over fourteen and employed at some lawful wage-earning occupation with parents’ consent.
      ii. Child presents reasons for nonattendance, and school board consents to child’s reasons.
   c. Enforcement
      i. Parent who does not ensure that child attends school is guilty of class 3 misdemeanor.

4. Arkansas
   a. Attendance is mandatory until the age of seventeen. ARK. CODE ANN. § 6-18-201 (Michie 1987).
   b. Noted exception:
      i. Child age sixteen or seventeen enrolled in approved adult education program is exempt from attendance policy.

5. California
   a. Attendance is mandatory until the age of eighteen. CAL. EDUC. CODE § 48200 (West 1993).

6. Colorado
   a. Attendance is mandatory until the age of sixteen. COLO. REV. STAT. § 22-33-104 (2004).
   b. Noted exception:
      i. Issued a work permit pursuant to Colorado law.

7. Connecticut
   a. Attendance is mandatory until the age of eighteen. CONN. GEN. STAT. ANN. § 10-184 (West 2002).
   b. Noted exception:
      i. Parents can consent to withdrawal of children aged sixteen and seventeen.
8. Delaware

9. Florida
   b. Note: School must notify parent of student’s withdrawal after age sixteen, but consent is not necessary.

10. Georgia

11. Hawaii
    b. Noted exceptions:
       i. Child is fifteen and suitably employed and has been excused from attendance by superintendent or by family court judge.
       ii. Upon consent by school and parents, child will receive alternative education.

12. Idaho
    b. Noted exception:
       i. Unless otherwise comparably taught, attendance is mandatory until sixteen.

13. Illinois
    b. Noted exception:
       i. Child between ages sixteen-eighteen who is employed in some occupation or service shall attend school part time.

14. Indiana
    a. Attendance is mandatory until the age of eighteen. Ind. Code Ann. § 20-8.1-3-17 (Michie 1997).
    b. Noted exception:
       i. Parent and guardian agree to student age sixteen-eighteen withdrawal. Student must consent to an exit interview where he signs withdrawal consent slip, along with parents.

15. Iowa
    a. Attendance is mandatory until the age of sixteen. Iowa Code Ann. § 299.1A (West 1996).
16. Kansas
   b. Noted exceptions: Child between sixteen-eighteen will be exempt if:
      i. Child enrolled in alternative education.
      ii. Child and parent attend final counseling interview, which is to encourage
      child to stay in school. Information is given to child regarding future earning
      potential of those who leave high school versus those who finish high school.

17. Kentucky
   b. Noted exception:
      i. Child between sixteen-eighteen who wishes to leave school must have
      written consent from parent and attend an exit interview with school
      officials.

18. Louisiana
   b. Noted exception:
      i. A student between the ages of sixteen and seventeen may withdraw from
      school with parent written consent.

19. Maine
   b. Noted exceptions: Child who reaches age fifteen or completed ninth
      grade, and:
      i. Consent from parent to withdraw, and;
      ii. Consent of principal to withdraw, and;
      iii. Consent from school board to withdraw, and;
      iv. Agree to meet with school board annually until child reaches age
      seventeen to discuss educational needs.

20. Maryland

21. Massachusetts

22. Michigan
23. Minnesota
   b. Noted exception:
      i. Students age sixteen-eighteen who wish to withdraw must obtain parents’ consent and attend meeting with school authorities to discuss educational opportunities available to student.

24. Mississippi

25. Missouri
   b. Noted exception:
      i. If gainfully employed with consent of superintendent, student may be excused from compulsory attendance.

26. Montana

27. Nebraska
   b. Noted exception:
      i. Student may be excused if necessary to work to support family. Id. § 79-202.

28. Nevada
   b. Noted exceptions:
      i. Student over fourteen and must support family. Id. 392.100.
      ii. Student over fourteen and engaged in full-time employment. Id. 392.110.

29. New Hampshire
   b. Noted exception:
      i. A child who wishes to terminate enrollment in school must have written consent of parent and a conference with the principal. Id. § 193:1(10).
30. New Jersey

31. New Mexico
   a. Attendance is mandatory until the age of eighteen. N.M. STAT. ANN. § 22-12-2 (Lexis 2003).
   b. Noted exceptions: Students between ages seventeen-eighteen may be excused by school board if:
      i. shown to have gainful employment and parental consent
      ii. enrolled in alternative education
      iii. parental consent and superintendent consent.

32. New York
   a. Attendance is mandatory until the age of sixteen. N.Y. EDUC. LAW § 3205 (McKinney 2001).
   b. Noted exceptions:
      i. If working full time, student will have to attend school part time.
      ii. In each city and union-free school districts having a population of more than 4500 people, the board of education shall have power to require minors from sixteen to seventeen years of age who are not employed to attend school full time.

33. North Carolina
   a. Attendance is mandatory until the age of sixteen. N.C. GEN STAT. § 15C-378 (2002).

34. North Dakota
   b. Noted exception:
      i. Child is necessary to the support of the child’s family. Id. § 15.1-20-02.

35. Ohio
   a. Attendance is mandatory until the age of eighteen. OHIO REV. CODE ANN. § 3321.01 (Anderson 2002).

36. Oklahoma
   a. Attendance is mandatory until the age of eighteen. 70 OKLA. STAT. § 10-105 (2001).
   b. Noted exception:
      i. A child between the ages of sixteen-eighteen is excused from attending school by written agreement between school administrator and parent.

37. Oregon
   a. Attendance is mandatory until the age of eighteen. OR. REV. STAT. § 339.010 (2003).
38. Pennsylvania
39. Rhode Island
   b. Noted exception:
      i. Children ages sixteen-eighteen shall attend school regularly unless they have written permission from parent to withdraw from school.
40. South Carolina
41. South Dakota
42. Tennessee
   a. Attendance is mandatory until the age of seventeen. TENN. CODE ANN. § 49-6-3005 (2002).
43. Texas
   a. Attendance is mandatory until the age of seventeen. TEX. EDUC. CODE ANN. § 25.085 (Vernon 1996).
44. Utah
   b. Noted exceptions:
      i. over sixteen and gainfully employed
      ii. school board determines that child is unable to profit from education because of poor attitude. Id. § 53A-11-102.
45. Vermont
   a. Attendance is mandatory until the age of sixteen. VT. STAT. ANN. tit. 16, § 1121 (1989).
46. Virginia
   a. Attendance is mandatory until the age of eighteen. VA. CODE ANN. § 22.1-254 (Michie 2003).
   b. Noted exception:
      i. School board may excuse student age sixteen-eighteen who has written consent of parent to withdraw from school.
47. Washington  
a. Attendance is mandatory until the age of eighteen. WASH. REV. CODE § 28A.225.010 (1997).  
b. Noted exception:  
   i. Children over the age of sixteen may be exempt if gainfully employed, and parent consents to withdraw.

48. West Virginia  
a. Attendance is mandatory until the age of sixteen. W. VA. CODE ANN. § 18-8-1 (Michie 2003).  
b. Noted exception:  
   i. Child shall be exempt from attendance if granted a work permit, but must have completed at least eighth grade.

49. Wisconsin  
a. Attendance is mandatory until the age of eighteen. WIS. STAT. ANN. § 118.15 (West 2004).  
b. Noted exception:  
   i. Any child who is sixteen-seventeen and obtains parent’s consent may withdraw if child and parent agree that child will participate in program or curriculum modification that will lead to graduation.

50. Wyoming  
a. Attendance is mandatory until the age of sixteen. WYO. STAT. ANN. § 21-4-102 (Michie 2003).
